Dear BLM-

We are appalled to hear the BLM is planning to increase herbicide use. The BLM checker-board ownership pattern in Oregon means thousands of people living where your poisons would be applied. We are impacted by drift, run-off, evaporation, and movement thru the soil.

1

There are no studies of accumulative or synergistic effects of use of multiple products, and no system for tracking who is using what poison in any given rural area. We don't need BLM adding to the soup of toxins.
