Reno, Nv. 89520-0006

Dear Brian,

The people who have signed this petition ask that
1 aerial spraying with herbicides not be done to noxious
plants in 17 Western states. It is impossible to direct
and control where herbicide might land or drift from
the air. Our human health and run off to tributaries
and rivers are at risk.

Please consider alternatives wherever possible.
If ground spraying is absolutely necessary please
be selective about the herbicides used and about
2 the competence of people doing the spraying and limit
the amount of herbicides to only what is aimed at
noxious weeds.

Thank you for your attention.

Sincerely,

Kathryn Tretter
