Buffalo FO

BLM 12-23-2010

Dear Sirs:

I am in favor of approving the land use permit under 43 CFR 2920-1.

I believe the ideology behind methane farming is a good and benificial theory. As it has been studied and tested already it should not hurt our water quality.

Since the work on these wells roads, locations etc. is already in place this makes a lot more sense than just plugging and abandoning these wells. I do hope this permit is approved and more will be in the future.

I would be happy to work with Patriot Energy on our own methane wells.

Sincerely,

Duane D. Odegard

Rancher in Campbell & Sheridan Counties
