Site-specific Environmental Assessment for Phase I Wind Turbine Development

The Bureau of Land Management (BLM) Rawlins Field Office is accepting scoping comments for a site-specific environmental assessment for Phase I Wind Turbine Development for the Chokecherry and Sierra Madre Wind Energy Project (CCSM). The CCSM Record of Decision determined that over 200,000 acres within the CCSM Project Area are suitable for wind energy development subject to the requirements described under the Selected Alternative, but did not identify individual turbine or infrastructure component locations. Subsequent tiered environmental assessments (EAs) are needed to analyze site-specific issues. The first analyzed is the infrastructure component EA, which was available for scoping from September 9 through November 4. The second EA will address the Phase I Wind Turbine Development. Please complete and submit this comment form at the public scoping meetings. You may also return this form by mail to the address on the reverse side. Fold this form on the lines with the return address showing, tape it closed, affix a stamp, and mail. You may attach additional pages. Comments may also be submitted via facsimile: 307-328-4224, or by e-mail: blm_wy_pcw_windfarm@blm.gov. Please include "Phase I Wind Turbine Development Scoping Comment" in the subject line. Your comment must be received by January 14, 2014 to be considered in the EA. For your comments to be the most effective, the BLM suggests the following guidelines:

- Be specific. Give defined reasons, not broad statements or opinions.
- Share site-specific observations, data, or knowledge.
- Detail important environmental and community factors.
- Be timely. Comments must be received by January 14, 2014 to be considered in the environmental assessment.

If you would like to be on our mailing list, but have no comments or questions, please complete the contact information below.

Please provide your contact information. If you would like to be on the mailing list, please check the box on the reverse side and submit this form.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
