

**TABLE 4-2. ESTIMATED NUMBER OF HUNTER DAYS
AND ESTIMATED NET VALUE OF HUNTING TRIPS ON PUBLIC LANDS
FOR FY 1998**

The BLM is revising the approach traditionally used to derive figures used in this table. BLM plans to reinstate this table in the FY 1999 edition of the *Public Land Statistics*.

Related estimates of hunter days and hunting economic value information are available from *The 1996 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation*, published by the U.S. Fish and Wildlife Service, and from *The Economic Importance of Hunting - Economic Data on Hunting Throughout The United States*, published by the International Association of Fish and Wildlife Agencies.
