Information Bulletin No. RS-2000-005

To: All Field Officials

From: Director, National Applied Resource Sciences Center

Subject: Road and Trail Condition Assessments DD: 12/31/99

This Information Bulletin serves as advance notification of instructions that will be issued by the Washington Office in the near future. The Bureau will be conducting condition assessments of a sampling of our roads and trails system during FY 2000. These condition assessments will be performed through the Bureau's Nationwide Architecture & Engineering (A/E) contract. The A/E will use the condition assessments to prepare cost estimates of the Bureau's deferred maintenance backlog for Roads and Trails.

The attached listing of routes has been randomly selected to receive assessment in FY 2000. In order to prepare our A/E contracts, we will need to receive the following information from each State by December 31, 1999.

1. The name and phone number of a Field Office contact person. This person will serve as the A/E's point of contact during the field inspection.
2. The current assigned maintenance level (definitions attached) for each selected route needs to be verified or corrected by the responsible line manager or designated acting.
3. Information for any routes with travel restrictions or other relevant information that would restrict the contractor's access.
4. 1:100,000 or better map of each route.

If you have any questions regarding this process, please call Frank Ciesel, RS-110, at (303) 987-6854.
