The Other 90%: How To Unlock Your Vast Untapped Potential For Leadership and Life:

Cooper is a faculty member of the "Lessons in Leadership Distinguished Speaker Series" and is known for his pioneering work in excelling under pressure and the neuro-science of trust, initiation and commitment. This book demonstrates that learning happens in many ways and that we cannot think with just our brains. We need to use our gut and heart to inform and guide us. He challenges his readers to take a radically different view of our human capacity to be more of what we are.

When it is not, we suffer more than we realize. Whyte shows us how we can foster qualities of courage and engagement to bring life and meaning to our organizations. We need the experience and work ethic of the older generation as well as the computer knowledge and creative energy of the younger people. This book helps us understand the great divide of styles at work and how to develop understanding, come together and thrive in our places of work. We can learn how to communicate better and develop tolerance by exploring the inherent complexities of our time, making our work life more gratifying. Regarded as a national expert on generational differences, Claire Raines is an award-winning author and management consultant.
