Information Bulletin No. NI-98- 4006

To: All BLM Employees

From: Director, National IRM Center

Subject: National Configuration Management Board (NCMB)

The Bureau of Land Management has a National Configuration Management Board (NCMB), located at the National Information Resources Management Center (NIRMC). This board is responsible for establishing, maintaining, and managing all national baselines for hardware and software. Florence Michael is the National Configuration Manager who serves as the board chair.

The NCMB deals only with national baselines and works closely with the State Configuration Management Boards on these issues. Issues which are State unique, and, therefore, not a national concern, are handled by the State CM Boards and should be addressed to them.

Questions and requests for changes for national baselines should be addressed to Florence either via e-mail (fmichael) or by phone at (303) 236-6427.
