

**FISCAL YEAR 2000 CARRYOVER FUNDING**

The BLM faces a significant funding need related to the National Landscape Conservation System for FY 2001. Management is considering a number of options to address this need, including reprogramming, base funding, and FY 2000 carryover. Due to last year’s fire season, some offices and programs have a higher than average amount of carryover. We need to know what each State, Center, and national office plans to use its carryover for and, conversely, what the impact would be if that carryover were not available.

Please use the table below to identify the planned use of carryover in your State, Center, and national office. Provide a name that identifies what the funds would be used for, the planned dollar amount of funding for that item, and a brief narrative description of the impact to your office if that funding were not available. Enter a separate row in the table for each significantly different item of work you want to identify.

Item Name	Dollar Amount of Carryover Planned (per Item)	Impact if carryover not available
