

Preparation Plan Data Needs/Status Table

1 Planning Questions	2 Needed Data Set(s)	3 Data Set Available? <i>Yes/No/Partially</i>	4 Proposed Remedy for Data Gaps?	5 Est. Cost? \$\$	6 Are FGDC Metadata Available? <i>Yes/No</i>	7 Name/Source of Data Standard?	8 Does Available Data Meet a National or Regional Standard?	9 Name/Source of Potential National or Regional Data Standard?
Where are actions needed to protect T&E fish species?	1998 Anadromous Fish Survey	Yes			Yes	Fish of the Western U.S. 1.21/56	Yes	
	District Stream Obstruction Survey, 1998	Yes			No	Local	No	N/A
	Landslide Locations	No	GPS survey of known landslide areas	25,000	will be developed	to be determined	N/A	unknown
	Road Locations	Yes			Yes	State DOT	No	National Road Designation Standard (1984) (FHWA)
Which recreation sites need maintenance?	Developed Recreation Site Survey	Yes	Contract for digitizing existing mylar maps; digitizing process will also create FGDC metadata.	200,000	will be developed	to be determined	No	unknown
What areas have high erosion risk?	Soil Maps (Order 3)	No	Contract with NRCS for Soil Survey with FGDC compliant metadata	6,000	will be developed	Soil Taxonomy, 2 nd Edition, 1999 (USDA/NRCS)	Yes	
All Questions (Base Map)	Updated Cadastral Survey	Partially	Existing surveys will be updated to support base mapping and boundary information (requires 2 surveyors/6WM each)	50,000	Yes	BLM Manual of Instructions for the Survey of the Public Lands of the United States, 1973	Yes	

Notes

1. PLANNING QUESTION - The question, or issue with a data requirement. (Pre-Plan Question/Issue from I.M. 2001-038)
2. NEEDED DATA SETS - The specific data needed to address the PLANNING QUESTION.
3. AVAILABILITY OF DATA SETS - Is there existing data or new data yet to be collected or acquired?
4. WORK TO OBTAIN/PREPARE DATA - If new data, describe how the data will be obtained. If existing data will be converted to GIS or some other format, describe processing.
5. ESTIMATED COSTS - Summary of costs associated with collecting or converting required data.
6. AVAILABILITY OF FGDC METADATA - Does metadata exist that is in compliance with the FGDC Geo-Spatial Metadata Content Standard?

7. NAME/SOURCE OF DATA STANDARD - what is or will be the name/source of the data standard?
What kind of standard is it: has it been designated by BLM at the National, State, Regional, Local level?
If the data does not meet a national or regional standard be sure to document the standard being used. If the data does not meet any standard, indicate that.

8. DATA MEETS NATIONAL OR REGIONAL STANDARD? - If there is a national or regional standard, does/will the data meet that standard? (VERIFY WITH DATA STEWARD)

9. NAME/SOURCE OF POTENTIAL DATA NATIONAL OR REGIONAL STANDARD - If there is a national or regional data standard in general use but is not being used in your plan, and you believe it would be an appropriate standard to work toward, list it.

Note: Entries for data sets that apply to more than one question should be cut and pasted to complete the entry for each line so that each action type/question is self-contained. This will enable us to more readily transfer the information to a database.
