BLM Removing North Spit Docks for the Winter

Coos Bay, Ore. – The Bureau of Land Management (BLM) will remove the docks from the water at the North Spit boat launch during the week of October 17, 2011.

“We can save the docks from a lot of wear and tear if we store them on dry ground during the stormy season,” said Bob Golden with the BLM. “The docks will be re-installed in March 2012.”

The other facilities at the North Spit boat launch will remain open throughout the winter. For further information about recreation opportunities on the BLM Coos Bay District, visit our website at:

About BLM

The BLM manages more land – 245 million surface acres – than any other Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western States, including Alaska. The Bureau, with a budget of about \$1 billion, also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM’s multiple-use mission is to sustain the health and productivity of the public lands for the use and enjoyment of present and future generations. The Bureau accomplishes this by managing such activities as outdoor recreation, livestock grazing, mineral development, and energy production, and by conserving natural, historical, cultural, and other resources on public lands.
