

# Klamath Falls Resource Area Planning Update Winter 2011

**BLM**  
Klamath Falls Resource Area

**As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.**

## **KLAMATH FALLS RESOURCE AREA PLANNING UPDATE Winter 2011**

**Planning Update General Information** – This Planning Update provides information about planning activities for projects proposed on the Bureau of Land Management (BLM) Klamath Falls Resource Area (KFRA). Most of the planning activities are performed in order to meet the requirements of the National Environmental Policy Act of 1969, as amended. The table included provides the location and brief description of most activities proposed within the Resource Area. (Refer to the map following the table.) Additional information can be obtained from the contact person listed in the project descriptions or the Resource Area Planner. As certain projects reach stages for public involvement, news releases and public notices may be published in the local Klamath Falls newspaper, *The Herald and News*.

**Klamath Falls Resource Area Resource Management Plan Update** – Since June 1995 the Klamath Falls Resource Area has been managing most lands under the direction of the Klamath Falls Resource Area Resource Management Plan (RMP). In addition, acquired lands at the Wood River Wetland have been managed under the Klamath Falls Resource Area Upper Klamath Basin and Wood River Wetland Record of Decision and Resource Management Plan (Wood River RMP) since February 1996.

In December 2008, the BLM issued six Records of Decision (RODs) for the Resource Management Plans (RMPs) that were developed under the Western Oregon Plan Revisions. On July 16, 2009 the U.S. Department of the Interior, withdrew the Records of Decision (2008 RODs) for the Western Oregon Plan Revisions and directed the BLM to implement actions in conformance with the resource management plans for western Oregon that were in place prior to December 30, 2008. These Planning Updates will continue to identify projects being considered for implementation that are designed to comply with the land use allocations, management direction, and objectives of the 1995 and 1996 RMPs.

If you have any questions on this update or recommendations for improvement, please notify us in person or call (541) 883-6916. The information contained in this Planning Update is also available on our website at: <http://www.blm.gov/or/districts/lakeview/plans/>. In order to reduce printing costs, please contact us if you wish to be removed from the mailing list.

Sincerely,

/s/ *Donald J. Holmstrom*  
Manager, Klamath Falls Resource Area
