AUMs

These figures represent livestock active preference forage allocation, expressed in animal unit months (AUMs)

Alternatives

- G Open for livestock grazing (entire allotment) under direction in this alternative
- Livestock grazing discontinued (mandatory)
 - * Livestock grazing discontinued if permit is voluntarily relinquished.
- R Reserve forage allotment (RFA) if the permit is voluntarily relinquished.
- G/R Open or RFA if the permit is voluntarily relinquished.
- *R Livestock grazing discontinued or RFA if the permit is voluntarily relinquished.
- XX% Percent of acres remaining open (or RFA) for livestock grazing (discontinued in remainder of allotment)

Management Category

The scores C, M, and I generally mean Custodial, Maintain, and Improve. See further descriptions, below.

Criteria 1-7 definitions

- C1 Standards for rangeland health. C = meeting all standards, M = not meeting one or more standards, but current livestock grazing is not a factor, U = Unknown, rangeland health not assessed yet, and I = not meeting one or more standards and current livestock grazing is known or expected to be a factor
- C2 Forage production present and potential. C = potential is low, and present is near potential, M = potential is moderate to high, present is near potential, and I = potential is moderate to high and present is low to moderate
- C3 Potential conflicts with recreation, other uses. C = low, M = moderate, I = high.
- C4 Potential conflicts with adjacent land use or busy roads. C = low, M = mod, I = high
- C5 Threatened, endangered, or sensitive species, high priority watersheds, or other important resources. C = no or not known at this time, M = some present or expected, and I = numerous present
- C6 Current livestock grazing management. C = satisfactory or is only logical practice, M = satisfactory, I = Unsatisfactory.
- C7 Prudent investor's willingness to invest. C = no, M = maybe, I = yes

Grazing System

These are the systems proposed to be implemented under Brothers/La Pine RMP direction, and subsequent direction contained in District Rangeland Program Summaries. This direction has been implemented as funding and priorities allow, during allotment evaluation, permit renewal, or rangeland health assessment.

- A Any system which maintains existing trends in ecological condition
- DR Deferred rotation
- E Early
- EX Exclusion
- R Rotation
- SD Short duration
- SF Summer/fall
- SS Spring/summer
- W Winter
- WS Winter/spring

Vacant: This refers to whether or not a grazing operator currently holds the permit. If not, the allotment is considered vacant and there is a "Y" in this column.
