Questions to consider for comments:

- What issues (in addition to those already identified) should the BLM consider as it prepares the Environmental Assessment (EA) for the rights of way?
- What would be the effects of the proposed action, and the alternatives? See website for maps.
- Does the BLM need to know additional information to make an informed decision?
- Are there other actions (past, present or future) in the area that would, in combination with the proposed action, have a significant effect?
