To: Region 6 Forest Service National Forest Supervisors; and Oregon/Washington, Bureau of Land Management District Managers

Subject: Pacific Northwest Recreation Map Series

The Pacific Northwest Recreation Map Series is an interagency series of maps that covers both Region 6 United States Forest Service and Bureau of Land Management administered lands in Oregon and Washington. This new series of maps is jointly produced and will be sold in both agencies distribution centers for the price of $7.00 per paper map or $8.00 for an all weather map.

The creation of the Pacific Northwest Recreation Map Series exemplifies the ongoing cooperation between these agencies in Service First endeavors. The development of this unique series of maps leverages each agencies resources and skills and saves both agencies money by reducing duplication and capitalizing on economies of scale. Further, a consistent regional collection of maps reduces the total number of maps visitors must buy to obtain dual-agency coverage. This series of maps achieves the National Service First goals for improving customer service and increasing operational efficiency.
