Fireworks Banned on BLM-Managed Lands in Oregon and Washington

PORTLAND – The U.S. Bureau of Land Management (BLM) prohibits the use of fireworks on all BLM-managed public lands throughout Oregon and Washington.

"With the relatively wet spring the Pacific Northwest is having and the recent warmer weather, the grasses and shrubs have had tremendous growth meaning lots of fuel for wildfires," explained Ed Shepard, State Director, Oregon/Washington BLM.

Those who ignite or operate fireworks on BLM-managed lands can be fined up to \$1,000, receive a prison term of up to one year, or both. In addition, individuals responsible for starting wildland fires on federal lands can be billed for the cost of fire suppression.

"In anticipation of the upcoming 4th of July holiday, BLM rangers are actively patrolling the public lands to ensure that visitors have a safe and enjoyable vacation," said Shepard. "They're prepared to issue citations to those who endanger other visitors and Oregon and Washington's natural resources by lighting fireworks."

The BLM manages 16 million acres of land in Oregon and Washington. The agency cooperates with the [Pacific Northwest Wildfire Coordinating Group](#) to fight wildland fires in the Pacific Northwest. Information about the BLM's fire program is available on the Oregon/Washington BLM web site at: <http://www.blm.gov/or/resources/fire/index.php>

About the BLM

The BLM manages more land – 258 million surface acres – than any other Federal agency. Most of this public land is located in 12 Western States, including Alaska. The Bureau, with a budget of about \$1.8 billion, also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's multiple-use mission is to sustain the health and productivity of the public lands for the use and enjoyment of present and future generations. The Bureau accomplishes this by managing such activities as outdoor recreation, livestock grazing, mineral development, and energy production, and by conserving natural, historical, and cultural resources on the public lands.
