

Dear Western Oregon BLM, —

Please do not open ^{1.7} million acres of BLM land to destructive logging practices, especially in old-growth and stream riparian areas. There is no greater damage you can cause than to pollute/clog the streams and rivers with the debris & runoff from logging. The destruction of old growth timber from clear cutting is equally damaging. If thinning of heavily timbered areas can be done outside of old-growth areas

Sincerely, please do this.
