

Dear Western Oregon BLM,

67 ✓
We oppose the new Western Oregon Plan Revision because it will open up 1.7 million acres of old growth and streamside reserves to logging. This plan is a step backwards and is unacceptable. As Oregonians, we recognize the importance of logging to our rural communities, but returning to the damaging practices of the 1970s is not a responsible solution. We should be focusing on thinning plantations and restoration forestry and protecting old-growth reserves for future generations to experience.

Sincerely,
Name: Elise and Sean Ferrarese

Address: 2590 Augusta St
Eugene OR 97403
