Revising the BLM's Resource Management Plans in Western Oregon  
RECEIVED

OCT 11 2007

There are a lot of good reasons not to cut these forests especially the most extreme like clear cuts and disregarding environmental laws. But what I want to speak to is Global Warming. Why don't we wait 5 or 50 years to see how fast things are happening. We may not be able to grow these temperate low elevation (very diverse) forest. And the trees that are here now are it. We want the countries with Rain forests to stop. We should stop, especially on public lands, and people need to switch to other Building ~~materials~~ materials. Why wait until ~~it can't use~~ it's gone. I feel like you're on a train, headed for a train wreck and refuse to stop it.
