Western Oregon Plan Revisions, 700
Dear Sir,

I wish to protest the BLM's Plan Revision which would in my opinion reinstate clear cutting of old growth trees in forests and riparian reserves in Western Oregon.

Cutting of old growth trees would increase greatly west & east of Salem, especially near St. Mary's Peak, one of my favorites areas. New cutting would take place in the Siuslaw & McKenzie watersheds, ^{which} could lead to siltation of rivers & creeks destroying fish habitats and drinking water.

Once cut, these glorious old forests are gone for good, as never again with the planted monoculture trees become true forest! Yours truly, Joan M. Bray
