To whome it may concern at the Bureau
of Land Management,

I am writing this letter in response
to the proposed Western Oregon Plan
Revision. As a former student of Natural
resource technologies I am aware of
sustainable forest management. The WOPR
obviously disregards sustainable forestry
practices. I do not support the WOPR
and I am asking you to not support it
either. There are other ways to support
rural communities, like thinning younger
already established "tree farms". Most mills
have already invested in equipment for smaller
trees.

Thank you for considering my comments
Sincerely John Wayne Gester
