RE: Western Oregon Plan Revision / WOPR

Dear Reader,

This voter in Oregon stands in opposition to WOPR and it's intent.

It is a strategy of the current administration to offer two non-choices both of which serve to strip protections from the under protected and exploited. In this case, one set of those victims are the VOICELESS, The other species have no advocate unless we speak for them. Their value is in their inter-relatedness, or what we humans call Nature.

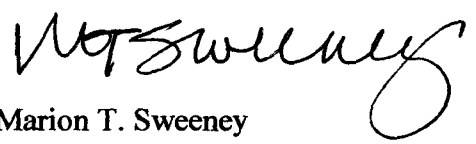

Pitted against them are the dependents on the federal subsidy payments who use compensation monies to supplement local county budgets.

THIS IS NOT A PLAN. IT IS AN ATTACK WHICH FORCES US ALL TO BE REACTIVE INSTEAD OF CONSTRUCTIVE.

This document is an example of fraternity boy logic, imposed on the rest of us. It is a fight over resources that cannot be replaced or recovered.

If we can afford to finance a travesty of a war, we can afford to continue our protection of our natural resources. We must embrace a long term plan for the future of all of us.

Sincerely,

Marion T. Sweeney
