JAN 11 2008

*To everyone concerned,*

*We have one poor stressed planet. For some reason the people that were put in charge of our environment care more about money than our natural resources. That we still have to write letters such as these shows how completely you disregard the will of the people. Do you think most people want to see the precious remaining Old Growth Forest completely destroyed? Do you honestly think that if most people knew what was really going on in our forests that they would be happy? I think not. You must stop business as usual and protect our rivers with the already aquatic protections in place.*

*We need to restore our rivers and forests not keep blindly hacking away till there is none left. Please use your common sense and don't let your self be once again swayed by greed and corruption. Enough is enough. Stay out of our few remaining road less areas. Stay out forever. Leave us this legacy.*

*A concerned citizen,*

*Julia and Michael Glastonbury*
