Comments:

Of all the alternatives, I choose the NO ACTION Alternative. I prefer the safeguards contained in the Northwest Forest Plan as it already exists with no "Revisions". The revisions reverse or otherwise deleteriously affect true ecological considerations. I am a long term Oregon resident wrestling with the complexities of forest management in the face of diverse competing "special interests". I've conducted research in Medford / Lakeview districts through government and private contracts. The evidence is clear to see, and I choose the NO ACTION Alternative as the only choice with a ghost of a chance at maintaining some minimal, ever shrinking cultural, aesthetic, and biological viability where we can all experience, enjoy, use, recreate in, and study true wonder, and possibly understand its purpose in our lives.
