DEAR BLM

Your current proposal (WOPR) is UNACCEPTABLE. This proposal is a short term fix for a lasting lifetime, it depletes our natural resources AND weakens forests, waters AND wildlife.

We should protect remaining old growth forests, AND put a focus on active management.

Most Americans want Federal AND Managers to embrace thinning second growth, safeguard communities from wildfire AND protect our nation's ancient forest.

Please protect remaining old growth forests, focus active management of BLM lands (our lands) in already logged over areas, AND concentrate job opportunities in forest restoration that would benefit us all.

Sincerely,

Susan Kendall
