Portland, Oregon 97208

BLM Western Oregon Plan Revisions:

We need to keep what few heritage forests remain in Oregon. BLM's forestry policies are already exploitive and don't need to be weakened. Anyone who hasn't been impacted by a BLM logging project should visit one of their sites. I have been hearing-seeing-and-distressed by one of their operations for the past three months. Living on Butte Creek Road, I can testify that there is no benefit to what BLM is doing to the land. Habitats are destroyed, erosion takes over, animals are displaced, and property is opened up to ATVs or other trespassers.

I hope the future of Oregon is considered before any modifications are acted on to increase BLM logging acreages. Their operations are already a disaster without compounding them.

*Don't expand the plan. Visit a site, don't
Just legislate.*

Sincerely,

Elizabeth Orr
