

## RIPARIAN-WETLAND TECHNICAL REFERENCES

June 2011

A strategy for accelerating cooperative riparian restoration and management was initiated in 1996 by the U.S. Forest Service and the Bureau of Land Management in corporation with the Natural Resources Conservation Service. The strategy was designed to integrate the physical, biological, and social dimensions of riparian-wetland management to achieve results for resources and communities. Several documents listed below have been developed to support this strategy and are available to the public. If you desire any of these publications, check the appropriate one(s) and e-mail to: [mdickard@blm.gov](mailto:mdickard@blm.gov) or contact Melissa Dickard at 303-236-0473.
