

**DECISION RECORD  
and  
FINDING OF NO SIGNIFICANT IMPACT**

- I. Decision:  
It is my decision to authorize replacement of the Campbell Tract Facility's Maintenance Shop, dry well and proper disposal of the contaminated material present in the existing dry well.
- II. Rationale for the Decision:  
This project will bring the roof drain system for the Campbell Tract Facility's Maintenance Shop into compliance with federal and State of Alaska environmental regulations concerning hazardous and solid wastes, and discharge of stormwater.
- III. Finding of No Significant Impact (FONSI):  
Based on the analysis of potential environmental impacts contained in the attached environmental assessment, I have determined that impacts are not expected to be significant and an environmental impact statement is not required.
- IV. ANILCA Section 810 Compliance:  
The proposed action will not significantly restrict Federal subsistence uses, decrease the abundance of federal subsistence resources, alter the distribution of federal subsistence resources, or limit qualified Federal subsistence user access.
- V. Adverse Energy Impact Compliance:  
This action has been analyzed as required by Washington Office Instruction Memorandum 2002-053 to determine if it will cause an adverse impact on energy development. The action will not have an adverse direct or indirect impact on energy development, production or distribution. The preparation of a Statement of Adverse Energy Impact is not required.
- VI. Compliance and Monitoring Plan:  
All aspects of the work will be conducted in accordance with applicable laws, regulations, and best management practices. Only an environmental contractor who is on the BLM Alaska Hazardous Materials Response contract will be utilized. The contractor will operate under their BLM approved Quality Assurance Plan. Work will be inspected by a dully authorized BLM Project Inspector. Regulatory oversight will be performed by the ADEC.

A safety fence will be erected and warning signs will be posted around the construction site and debris pile to protect employees and casual users of Campbell Tract.
