CNDDDB doesn't yet show these occurrences (as of 11-17-2010) but this is because they didn't know about them at last update (pers. comm. Nick Jensen, May 2009). This is a significant range extension.								K	K

Senecio clevelandii var. heterophyllus	Red Hills ragwort	VASC	Asteraceae			BLMS			None	None		Yes	16-Nov-10	<i>Senecio clevelandii</i> is now <i>Packera clevelandii</i> , but the combination <i>Packera clevelandii</i> var. <i>heterophylla</i> has not been validly published because this var. has been reduced to synonymy in the Jepson Manual 1st and 2nd editions. The treatment by Barkley in Jepson Manual 1 was not based on genetic work. Barkley's treatment has been continued by Trock in Jepson Manual 2 and Flora North America. Both CNPS and BLM will continue to recognize the variety until genetic work conclusively shows that vars. <i>clevelandii</i> and <i>heterophyllus</i> are actually the same taxon.											K
