Senecio clelandii var. heterophyllus	Red Hills ragwort	VASC	Asteraceae			BLMS			None	None		Yes	16-Nov-10	<i>Senecio clelandii</i> is now <i>Packera clelandii</i> , but the combination <i>Packera clelandii</i> var. <i>heterophylla</i> has not been validly published because this var. has been reduced to synonymy in the Jepson Manual 1st and 2nd editions. The treatment by Barkley in Jepson Manual 1 was not based on genetic work. Barkley's treatment has been continued by Trock in Jepson Manual 2 and Flora North America. Both CNPS and BLM will continue to recognize the variety until genetic work conclusively shows that vars. <i>clelandii</i> and <i>heterophyllus</i> are actually the same taxon.											K

Type of Plant: BRYO = Bryophyte; FUNG = Fungus; LICH = Lichen; VASC = Vascular plant; Federal Status: FE = Federally Endangered; FT = Federally Threatened; FC = Federal Candidate; FP = Proposed for Federal Listing; FD = Federally Delisted. State of California (CA) Status: SE = State Endangered; ST = State Threatened; SR = State Rare. California Native Plant Society (CNPS) Status: List 1A = Plants presumed extinct in CA; List 1B = Plants rare, threatened, or endangered in CA and elsewhere; List 2 = Plants rare, threatened, or endangered in CA, but more common elsewhere; List 3 = Plants about which more information is needed; List 4 = Plants of limited distribution – a watch list. Decimals following the CNPS List Numbers: x.1 = Seriously endangered in CA; x.2 = Fairly endangered in CA; x.3 = Not very endangered in CA. Nevada Native Plant Society (NNPS) Status: W = Watch List. State of Nevada (NV) Status: CE = Critically Endangered; CE# = Proposed for Critically Endangered. Global and State Rank: The Global Rank is assigned by NatureServe and reflects the overall condition of the element throughout its global range; G-ranks are used for species as a whole, T-ranks for subspecies; the State (S) Rank is assigned by the State Heritage Program and reflects the overall condition of the element within the State. Code meanings can be found at: <http://www.natureserve.org/explorer/ranking.htm#interpret>. Comments: Additional information, only provided for some plants. Date Updated: This field is provided to show when changes or updates were last made to an element; this tracking was implemented only in recent years, so the field is blank for most elements. K or S under BLM field offices: K = Known to occur on BLM lands managed by that field office; S = Suspected to occur on BLM lands managed by that field office.
