Cedar Fire 90% contained

Craig, CO – Fire crews working the Cedar Fire today were successful in holding the fireline during this afternoons gusty winds. The Wyoming Hot Shot crew was released this afternoon along with the squad. Three Bureau of Land Management engine crews will continue mop-up. The fire was mapped at 71 acres. The cause is under investigation.

The Winter Fire reported high winds this afternoon but crews held the fireline. The Craig and Tatanka Hot Shot crews have begun mop-up and will continue reinforcing the fireline. The Winter Fire is 70% contained and 44 acres.

The Cedar Fire is five miles northwest of Craig on BLM public land.

The Winter Fire is five miles southwest of Elk Springs on BLM public land.

No structures are threatened and no injuries reported for either incident.
