

NEPA

Record of Decision

Waiting Period

The BLM must wait at least 30 days after the Final Environmental Impact Statement (EIS) has been released before issuing its final decision on the *OTR* land use authorization application. This document is called the Record of Decision (ROD).

Record of Decision

In addition to announcing BLM's decision, the ROD states the alternatives considered, identifies the environmentally preferred alternative, and discusses all other factors that were considered in the decision process.

Mitigation Measures

If BLM's decision is to authorize *OTR's* land use authorization application, the ROD will also state any terms, conditions, and any mitigation measures that the BLM determines OTR Corp must implement to offset or reduce identified impacts to the environment.

Enforcement & Monitoring

The ROD describes any enforcement and monitoring programs that BLM will require of OTR Corp.
