

June 9, 2008

NOTICE OF COMPETITIVE LEASE SALE
OIL AND GAS

The Colorado State Office is offering competitively 46 parcels containing 72,997.92 acres of Federal lands in the State of Colorado for oil and gas leasing. This notice provides:

- the time and place of the sale,
- how to participate in the bidding process,
- the sale process,
- the conditions of the sale,
- how to file a noncompetitive offer after the sale, and
- how to file a presale noncompetitive offer.

Attached to this notice is a list of the lands being offered by parcel number and legal land description; we have included stipulations that apply to each parcel. This notice and other information regarding oil and gas leasing in the state of Colorado is also available on our website at:

http://www.blm.gov/co/st/en/BLM_Programs/oilandgas/leasing.html

When and where will the sale take place?

When: The competitive oral sale will begin at 9 a.m. on August 14, 2008. The sale room will open one hour earlier to allow you to register and obtain your bid number. Registration begins at 8 a.m.

Where: The sale is held at the Bureau of Land Management, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215. Parking is available.

Access: The sale room is accessible to persons with disabilities. If assistance is needed for the hearing or visually impaired, contact Karen Zurek at (303)239-3795.

How will the sale be conducted?

The sale will be conducted by oral auction. You must make your bids verbally. The winning bid is the highest verbal bid equal to or exceeding the national minimum acceptable bid.

How do I participate in the bidding process?

To participate in the bidding process, you must register to obtain a bid number. We will begin registering bidders at 8 a.m. on the day of the sale. Bidders must register in order to bid on a parcel.

What is the sale process?

Starting at 9 a.m. on the day of the sale:

- the auctioneer will offer the parcels in the order they are shown in the attached notice,
- all bids are on a per-acre basis, rounded up to whole acres, for the entire acreage in the parcel,
- the winning bid is the highest oral bid equal to or exceeding the minimum acceptable bid, and
- **the decision of the auctioneer is final.**

The minimum acceptable bid is \$2 per acre. If a parcel contains fractional acreage, round it up to the next whole acre; for example, a parcel of 100.401 acres requires a minimum bid of \$202 (\$2 x 101 acres).

How long will the sale last?

We begin the sale at 9 a.m. and it continues until all of the parcels in this Notice have been offered. The length of the sale depends on the number of parcels we are offering and the pace of the bidding. Normally, the sale is done by noon.

What conditions apply to the lease sale?

- **Parcel withdrawal or sale cancellation:** We reserve the right to withdraw any or all parcels before the sale begins. If we withdraw a parcel, we will post a notice in the State Office Information Access Center (Public Room). If we cancel the sale, we will try to notify all interested parties early enough to stop them from traveling to the sale site.
- **Fractional interests:** 43 CFR 3120.1-2(c) If the United States owns less than 100 percent of the oil and gas mineral interest for the land in a parcel we will show that information with the parcel. When we issue the lease, it will be for the percentage or fraction of interest the United States owns. However, you must calculate your bonus bid and advance rental payment on the gross acreage in the parcel, not the United States net interest. For example, if a parcel contains 200 acres and the United States owns 50 percent of the oil and gas mineral interest, the minimum bonus bid will be \$400 (\$2 x 200 acres) and the advance annual rental will be \$300 (\$1.50 x 200 acres) for the first 5 years and \$400 (\$2 x 200 acres) for the remainder of the lease term. Conversely, your chargeable acreage and royalty on production will be calculated on the United States net.
- **Payment due:** You cannot withdraw a bid. Your bid is a legally binding contract when you sign the bid form; accept the lease; and pay all monies due. For each parcel you win, the **money due the day of the sale** is the total of the bonus bid deposit (at least \$2 per acre), the first year's rent (\$1.50 per acre), and the administrative fee (\$140). You may pay at the sale site or by 4 p.m. at the Colorado State Office. You must pay any remaining balance due by **4 p.m. August 28, 2008**, which is the tenth working day following the sale. **If you do not pay the balance due by this date, you forfeit the right to the lease and all money paid the day of the sale.** If you forfeit a parcel, we may offer it at a future sale.
- **Form of payment:** You can pay by:
personal check, certified check, money order or
credit card (Visa, MasterCard, American Express, and Discover cards only).

Effective February 1, 2005, BLM will not accept credit or debit card payments to the Bureau for an amount equal to or greater than \$100,000. We also will not accept aggregated smaller amounts to bypass this requirement. **Colorado BLM will no longer accept payments by Automated Clearing House (ACH) or Fed Wire Transfers.**

We cannot accept cash. Make checks payable to: **Department of the Interior-BLM**. If a check you have sent to us in the past has been returned for insufficient funds, we may require that you give us a guaranteed payment, such as a certified check. If you pay by credit card and the transaction is refused, we will try to notify you early enough so that you can make other payment arrangements (If you plan on submitting your payment on the day of the sale using a credit card please be sure that you call and notify your bank). *However, we cannot grant you any extension of time to pay the money that is due the day of the sale.*

- **Bid form:** On the day of the sale, if you are the successful bidder, you must give us a properly completed and signed competitive bid form (Form 3000-2 dated October 1989 or later) with the required payment on the day of the sale. This form constitutes a legally binding offer by the prospective lessee to accept a lease and all its terms and conditions. Once the form is signed, you cannot change it. *We will not accept any bid form that has information crossed out or is otherwise altered.*

Fillable bid forms are available online at:

<https://www.blm.gov/FormsCentral/show-form.do?nodeId=672#>

We recommend you get a copy of the bid form and complete all but the parcel number and money part before the sale. You can fill out the money part at the sale. Your completed bid form certifies:

- (1) that you and/or the prospective lessee are qualified to hold an oil and gas lease under our regulations at 43 CFR 3102.5-2; and
 - (2) that both of you have complied with 18 U.S.C. 1860, a law that prohibits unlawful combinations, intimidation of and collusion among bidders.
- **Federal acreage limitations:** Qualified individuals, associations, or corporations may only participate in a competitive lease sale and purchase Federal oil and gas leases from this office if such purchase will not result in exceeding the State limit of 246,080 acres of public domain lands and 246,080 acres of acquired lands (30 U.S.C. 184(d)). For the purpose of chargeable acreage limitations, you are charged with your proportionate share of the lease acreage holdings of partnerships or corporations in which you own an interest greater than 10 percent. Lease acreage committed to a unit agreement or development contract that you hold, own, or control is excluded from chargeability for acreage limitation purposes.

The acreage limitations and certification requirements apply for competitive oil and gas lease sales, noncompetitive lease offers, transfer of interest by assignment of record title or operating rights, and options to acquire interest in leases regardless of whether an individual, association, or corporation has received, under 43 CFR 3101.2-4, additional time to divest excess acreage acquired through merger or acquisition.

- **Lease terms:** A lease issued as a result of this sale has a primary term of 10 years. It will continue beyond its primary term as long as oil or gas in paying quantities is produced on or for the benefit of the lease. Rental at \$1.50 per acre for the first 5 years (\$2 per acre after that) is due on or before the lease anniversary date each year until production begins. Once a lease becomes producing, royalty of 12.5 percent must be paid. You will find other lease terms on our standard lease form (Form 3100-11, July 2006). (**Note:** You may copy the lease form, but if you copy an obsolete lease form, your offer will be rejected. The copy you make must be legible.)
- **Split Estate:** Information regarding leasing of Federal minerals overlain with private surface, referred to as “Split Estate,” is available at the following Washington Office website. A Split Estate brochure is available at this site. The brochure outlines the rights, responsibilities, and opportunities if private surface owners and oil and gas operators in the planning, lease sale, permitting/development, and operations/production phases of the oil and gas program: www.blm.gov/bmp/Split_Estate.htm
- **Stipulations:** Stipulations are part of the lease and supersede any inconsistent provisions of the lease form.
Stipulations and consent to lease for parcels located within Forest Service boundaries can be viewed at:
http://www.fs.fed.us/r2/resources/mgr/minerals/lease_sales/lease_sale_by_state/colorado/co.shtml
- **Lease issuance:** After we have received the bid form and all monies due, the lease can be issued. The lease effective date is the first day of the month following the month in which we sign it. If you want your lease to be effective the first day of the month in which we sign it, you must ask us in writing to do this. We have to receive your request before we sign the lease.

Legal Land Descriptions: We prepared the Notice with land status information from our Legacy Rehost 2000 (LR2000) case recordation system. We are providing you with the following information to assist you in understanding the legal descriptions given for each parcel:

The township and range contains additional zeros. For example, T. 9 S., R. 92 W., is shown as, T. 0090S., R. 0920W. (additional zeros underlined).

Lands are described separately by Lot, aliquot parts, tracts, and exceptions to survey for each section.

Cellular Phone Usage: Cellular phones are not allowed to be used in the sale room. Please remember to silence your phones before the sale begins.

Other Conditions of the Sale: At the time the sale begins, we will make any rules regarding sale procedures that we feel are necessary for the proper conduct of the sale.

Mailings and Deliveries: All mailings and deliveries to the Bureau of Land Management must have return addresses or we won't be able to accept delivery of them.

NONCOMPETITIVE OFFERS TO LEASE

How do I file a noncompetitive day-after-sale offer after the sale?

Parcels that do not receive a bid are available on a first-come, first-served basis for a two-year period beginning the day after the sale. If you want to file a noncompetitive offer on an unsold parcel, you must file in this office:

- an offer to lease form (Form 3100-11 dated July 2006) properly filled out and signed. The lands in your offer must be described as specified in our regulations at 43 CFR 3110.5; and
- your remittance for the total of the \$360 filing fee and the advanced first year's rental (\$1.50 per acre). Remember to round up any fractional acreage when you calculate the amount of rental.

We will have a drop box in the payment room. All offers, filed the day of a sale and the first business day after it are considered filed simultaneously. When a parcel receives more than one filing by 4 p.m. on the day after the sale, a drawing is held to determine the winner. A presale offer has priority over any offer filed after the sale. After the day-after-sale drawing, any parcels remaining are available for a period of two years. Offers receive priority as of the date and time of filing in this office.

How do I file a noncompetitive presale offer?

Under our regulations at 43 CFR 3110.1(a), you may file a noncompetitive presale offer for lands that:

- are available;
- have not been under lease during the previous one-year period; or
- have not been included in a competitive lease sale within the previous two-year period.

If we do not get a bid for the parcel that contains the lands in your presale offer, it has priority over any offer for that parcel filed after the sale. Your presale offer is your consent to the terms and conditions of the lease, including any additional stipulations.

If you want to file a presale offer you must file in this office:

- an offer to lease form properly filled out and signed. The lands in your offer must be described as specified in our regulations at 43 CFR 3110.5; and

- your remittance for the total of the \$360 filing fee and the advanced first year's rental (\$1.50 per acre). Remember to round up any fractional acreage when you calculate the amount of rental.

When is the next competitive oil and gas lease sale scheduled?

We have tentatively scheduled our next competitive sale for **November 13, 2008**. Expressions of Interest (EOI's) cutoff for the November 13, 2008 Sale is June 27, 2008. Expressions of Interest cutoff for the February 12, 2009 Sale is September 12, 2008. We can make no guarantee as to when a given parcel will be offered for competitive sale. We will try to put EOI's on the earliest possible sale.

How do I file an Expression of Interest (EOI)?

An Expression of Interest (EOI) is an informal nomination to request that certain lands be included in an oil and gas competitive lease sale. This request must be made in writing or can be E-mailed to co_leasing_info@blm.gov. No filing fee or rental is required with an EOI. We are required (43 CFR 3120.4-2) to post the Notice of Competitive Sale 45 days prior to the sale. The oil and gas plats also must be notated with the parcels 45 days prior to the sale. This is a very complicated and lengthy process. Please keep this in mind when making future plans regarding a federal oil and gas lease.

As of August 8, 1995, all BLM offices must hold as confidential the names of all parties that file an informal EOI until 2 days following the last day of the competitive sale, or in other words, until the next day following the conclusion of the noncompetitive day-after-the sale filings.

Make sure your EOI contains the minimum following information:

- Your name or company name with mailing address and telephone number.
- Complete legal land description.

How can I find out the results of this sale?

We will post the sale results in the State Office Information Access Center (Public Room) and on our public Internet site when we have compiled them. You can buy a printed copy of the results list for \$5 from the Information Access Center. The list will also be available at our public Internet site: http://www.blm.gov/co/st/en/BLM_Programs/oilandgas/leasing.html

PROTEST INFORMATION

Protests for the August 14, 2008 Competitive Oil & Gas Sale must be received by

4:00 P.M. on July 30, 2008

May I protest BLM's decision to offer the lands in this Notice for lease?

Yes, under regulation 43 CFR 3120.1-3, you may protest the inclusion of a parcel listed in this sale notice. All protests must meet the following requirements:

- We must receive a protest no later than close of business on the 15th calendar day prior to the date of the sale. If our office is not open on the 15th day prior to the date of the sale, a protest received on the next day our office is open to the public will be considered timely filed. Close of business for the Colorado State office is **4:00 pm** which is when the Information Center (Public Room) closes. The protest must also include any statement of reasons to support the protest. **We will dismiss a late-filed protest, protest filed without a statement of reasons, or a protest listing the 4-digit ID number.**
- A protest must state the interest of the protesting party, their mailing address, **and reference the specific COC 5-digit serial number that they are protesting.**

- You may file a protest either by mail in hardcopy form or by telefax. You may not file a protest by electronic mail. A protest filed by fax must be sent to **303-239-3799**. A protest sent to a fax number other than the fax number identified or a protest filed by electronic mail will be dismissed.
- If the party signing the protest is doing so on behalf of an association, partnership or corporation, the signing party must reveal the relationship between them. For example, unless an environmental group authorizes an individual member of its group to act for it, the individual cannot make a protest in the group's name.

If BLM receives a timely protest of a parcel advertised on this Sale Notice, how does it affect bidding on the parcel?

We will announce receipt of any protests at the beginning of the sale. We will also announce a decision to either withdraw the parcel or proceed with offering it at the sale.

If I am the high bidder at the sale for a protested parcel, when will BLM issue my lease?

We will issue no lease for a protested parcel until the State Director makes a decision on the protest. If the State Director denies the protest, we will issue your lease concurrently with that decision.

If I am the successful bidder of a protested parcel, may I withdraw my bid and receive a refund of my first year's rental and bonus bid?

No. In accordance with BLM regulations (43 CFR 3120.5-3) you may not withdraw your bid.

If BLM upholds the protest, how does that affect my competitive bid?

If we uphold a protest and withdraw the parcel from leasing, we will refund your first year's rental, bonus bid and administrative fee. If the decision upholding the protest results in additional stipulations, we will offer you an opportunity to accept or reject the lease with the additional stipulations prior to lease issuance. If you do not accept the additional stipulations, we will reject your bid and we will refund your first year's rental, bonus bid and administrative fee.

If BLM's decision to uphold the protest results in additional stipulations, may I appeal that decision?

Yes, you may. **NOTE:** an appeal from the State Director's decision must meet the requirements of Title 43 CFR §4.411 and Part 1840.

May I appeal BLM's decision to deny my protest?

Yes, you may. **NOTE:** an appeal from the State Director's decision must meet the requirements of Title 43 CFR §4.411 and Part 1840.

May I withdraw my bid if the protestor files an appeal?

No. If the protestor appeals our decision to deny the protest, you may not withdraw your bid. We will issue your lease concurrently with the decision to deny the protest. If resolution of the appeal results in lease cancellation, we will authorize refund of the bonus bid, rentals and administrative fee if—

- there is no evidence that the lessee(s) derived any benefit from possession of the lease during the time they held it, and;
- There is no indication of bad faith or other reasons not to refund the rental, bonus bid and administrative fee.

FOREST SERVICE PARCELS: All bidders are hereby notified that stipulations for parcels located within the administrative boundaries of some Forest Service units are described in terms of the appropriate Forest plan. No description of those parts of the parcels affected by any given stipulations is available other than as depicted on Forest Maps, which are generally taken from the USGS quadrangles. Copies of the original maps and stipulations may be reviewed in the appropriate District Ranger's Office, the Forest Supervisor's Office, or the Rocky Mountain Regional Forester's Office at 740 Simms St., Lakewood, Colorado (303) 275-5090.

NOTE: The posting of this notice serves to withdraw the lands listed herein from filings under 43 CFR 3110.1(a)(1)(ii).

Who should I contact if I have questions?

If you have questions on BLM stipulations, lease notices, etc., please contact the appropriate BLM Field Office for assistance. If you have questions on another surface management agency's stipulations or restrictions, etc., for parcels under their surface management jurisdiction, please contact that agency. For general information about the competitive oil and gas lease sale process, or this Notice, you may e-mail or call:

Ms. Ginny Buller: e-mail ginny_buller@blm.gov or phone (303) 239-3777

Mr. Justice Rhodes: e-mail justice_rhodes@blm.gov or phone (303) 239-3928

SURFACE MANAGEMENT AGENCY DESCRIPTION

The list of parcels offered for competitive sale includes a description of the surface management agency(ies) involved. Where the surface is administered by a federal agency other than the BLM, the coordinating BLM District and Resource Area Offices are depicted immediately below. The following abbreviations are used:

	Surface Management Agencies
BLM	Bureau of Land Management
PVT	Private surface
FS	Forest Service surface
NF	National Forest
	BLM District Offices
MDO	Montrose District Office
	BLM Resource Area Offices
GSRA	Glenwood Springs Resource Area (GJDO)
UBRA	Uncompahgre Basin Resource Area (MDO)

Sample Number 1: PVT/BLM: GSRA (This entry shows the parcel contains both private and BLM surface located in the Glenwood Springs Resource Area.)

Sample Number 2: FS: Gunnison-GM-UNC NF; MDO: UBRA (This entry shows the parcel is Forest Service land in the Grand Mesa, Uncompahgre and Gunnison National Forests. The coordinating BLM office is in the Uncompahgre Basin Resource Area in the Montrose District Office.)

THE FOLLOWING PUBLIC DOMAIN LANDS ARE SUBJECT TO FILINGS IN THE MANNER SPECIFIED IN THE APPLICABLE PORTIONS OF THE REGULATIONS IN 43 CFR, SUBPART 3120.

SERIAL #: COC73049

T. 0130S., R 0890W., 6TH PM

- Sec. 7: SE;

Garfield County
Colorado 1819.960 Acres

All lands are subject to Exhibit CO-34 to alert lessee of potential habitat for a threatened, endangered, candidate, or other special status plant or animal.

All lands are subject to Exhibit CO-39 to protect cultural resources.

The following lands are subject to Exhibit GS-NSO-ROAN-22 to protect steep slopes greater than 50%:

T. 0060S., R 0940W., 6TH PM
Sec. 1: SWSW;
Sec. 2: S2NW, NWSW, N2SE, SESE;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: N2;
Sec. 12: Lot 3.

The following lands are subject to Exhibit GS-NSO-ROAN-23 to protect riparian and wetland habitat:

T. 0060S., R 0940W, 6TH PM
Sec. 1: Lot 4.

The following lands are subject to Exhibit GS-NSO-ROAN-27 to protect wildlife security areas below the rim.

T. 0060S., R 0940W., 6TH PM
Sec. 2: SWNW, NWSW;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: NENE, NWNW.

The following lands are subject to Exhibit GS-NSO-ROAN-30 to protect the I-70 viewshed:

T. 0060S., R 0940W., 6TH PM
Sec. 2: S2NW, N2SE;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: W2NE, NW;
Sec. 12: Lot 3.

The following lands are subject to Exhibit GS-CSU-ROAN-04 to protect erosive soils and slopes greater than 30 percent:

T. 0060S., R 0940W., 6TH PM
Sec. 1: SWSW;
Sec. 2: S2NW, NWSW, N2SE, SESE;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: N2;
Sec. 12: Lot 3.

The following lands are subject to Exhibit GS-CSU-ROAN-07 to protect riparian and wetland habitat:

T. 0060S., R 0940W., 6TH PM
Sec. 1: Lot 4, 5.

The following lands are subject to Exhibit GS-CSU-ROAN-12 to protect habitat for special status plant species populations and significant plant communities:

T. 0060S., R 0940W., 6TH PM
Sec. 2: NWSW;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: N2.

The following lands are subject to Exhibit GS-CSU-ROAN-14 to protect VRM Class II areas below the rim:

T. 0060S., R 0940W., 6TH PM
Sec. 1: Lot 3-5;
Sec. 2: S2NW, NWSW;
Sec. 3: Lot 2, 3;
Sec. 3: S2NE;
Sec. 4: Lot 1-4;
Sec. 4: SWNE, S2NW, S2;
Sec. 8: N2.

The following lands are subject to Exhibit GS-CSU-ROAN-18 to protect Sharrard Park paleontological resources:

T. 0060S., R 0940W., 6TH PM
Sec. 8: NENE.

All lands are subject to Exhibit GS-TL-ROAN-13 to protect big game winter range.

All lands are subject to Exhibit GS-LN-ROAN-1 to notice lessee of other required conditions of approval.

BLM: GSRA

Appendix B – Stipulation Definitions for Roan Plateau Oil and Gas Lease Sale

In prior planning efforts, BLM has explicitly stated the criteria for which exceptions, modifications, or waivers to a specific stipulation would apply. BLM no longer plans for exception to stipulations. Instead the conditions under which each stipulations would apply, and standards that must be met for their application, are explicitly stated. Exceptions may still be applied should unforeseen circumstances arise or new information become available. Likewise, these standards may be modified, as necessary, to provide the protections to resources for which they were intended.

EXHIBIT CO-34

Lease Number:

ENDANGERED SPECIES ACT SECTION 7 CONSULTATION STIPULATION

The lease area may now or hereafter contain plants, animals, or their habitats determined to be threatened, endangered, or other special status species. BLM may recommend modifications to exploration and development proposals to further its conservation and management objective to avoid BLM-approved activity that will contribute to a need to list such a species or their habitat. BLM may require modifications to or disapprove proposed activity that is likely to result in jeopardy to the continued existence of a proposed or listed threatened or endangered species or result in the destruction or adverse modification of a designated or proposed critical habitat. BLM will not approve any ground-disturbing activity that may affect any such species or critical habitat until it completes its obligations under applicable requirements of the Endangered Species Act as amended, 16 U.S.C. § 1531 et seq., including completion of any required procedure for conference or consultation.

On the lands described below:

EXHIBIT CO-39

Lease Number:

CONTROLLED SURFACE USE

This lease may be found to contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O.13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

On the lands described below:

EXHIBIT CO-45

Lease Number:

COAL MINE METHANE STIPULATIONS

The following terms and conditions are added and made a part of the printed form 3100-11 and shall supersede any terms and conditions to the contrary in the printed form 3100-11.

1. This lease grants the exclusive right for the capture, removal, storage and transportation of Coal Mine Methane, known also as mine ventilation gas (hereinafter referred to as "CMM"), and for no other purpose (except as authorized by Number 3 below). The lessee shall have the right to capture, remove, utilize, dispose and transport all the CMM gathered at the discharge point of bore holes drilled and constructed by the coal mining company that holds the rights to develop coal located beneath the lands covered under this lease ("Mine Operator"). These bore holes drilled and constructed by the Mine Operator shall hereinafter be referred to as "Methane Drainage Wells."
2. Prior to commencing the capture, removal, storage and transportation of CMM under this lease, the lessee shall enter into a surface use agreement with the Mine Operator covering the following operational issues pertaining to CMM collection: (i) permitting, construction, operation and reclamation of roads, pipelines, powerlines and ancillary facilities; (ii) coordination of operation permits and responsibility for violations, environmental reviews and contact with regulatory agencies; and (iii) reclamation obligations. Lessee shall provide proof of such agreement to the BLM authorized officer.
3. This lease does not grant the right to drill for oil and gas in the lands herein described. All gas collection will occur from the discharge points of the Methane Drainage Wells except where the lessee enters into a written agreement with the Mine Operator allowing oil and gas exploration and development. The lessee shall provide the authorized officer proof of such oil and gas exploration agreement.
4. All operations and activities to capture, remove, store and transport CMM under this lease shall be conducted in compliance with applicable law as well as pertinent safety rules and practices of the Mine Operator.
5. In the event that a disagreement arises between the lessee and the Mine Operator over the implementation of the oil and gas lease and/or these stipulations, the BLM authorized officer will intervene and use all pertinent lease terms, regulations, and policy to determine what course of action is in the public's interest, provided however, under no circumstances will the BLM authorized officer approve any oil and gas operations that are inconsistent with these stipulations or that compromise maximum economic coal recovery or the safety of underground mining operations.
6. The discharge of CMM is solely at the discretion of the Mine Operator and may be conducted, stopped, or altered at any time for mine safety, maintenance of the ventilation system, or for any other purpose deemed necessary to the Mine Operator; however, the Mine Operator is required to provide reasonable notification to the lessee of such stoppage or alteration except in the case of an emergency. The Mine Operator shall not be responsible for the quantity or quality of the CMM.
7. The lessee must submit a plan detailing collection activities to the BLM authorized officer within six months of the effective date of the oil and gas lease.

On the lands described below:

EXHIBIT CO-46

Lease Number:

LEASE NOTICES

1. This lease is subject to valid existing rights to mine and extract the coal under the applicable Federal coal leases and the approval granted under those leases.
2. BLM will not approve any oil and gas operations which interfere with the coal mining in the lands herein described.
3. The Mine Safety and Health Administration shall have jurisdiction over all safety issues related to coal mining, which may include CMM collection by the lessee.

On the lands described below:

EXHIBIT CO-47

Lease Number:

ROAN LEASE UNITIZATION STIPULATION

Establishment of a single undivided Federal exploratory unit will be required for all leases located on top of the Roan Plateau.

The unit agreement will be amended to include the requirements identified in the Record of Decision for the Roan Plateau Approved Resource Management Plan Amendment.

No operations on the leases will be approved by BLM until the unit agreement is designated and approved. 100% commitment of all the leases will be required before unit agreement approval will be granted.

On the lands described below:

EXHIBIT GS-NSO-ROAN-17

Lease Number:

WILD AND SCENIC RIVER ELIGIBILITY CORRIDOR

To protect stream segments eligible for a suitability study under the Wild and Scenic Rivers Act (WSRA), no ground-disturbing activities would be allowed within 0.25 mile of any stream segment(s) determined to meet criteria for eligibility for designation as a Wild and Scenic River. These include a total of 64 stream miles in portions of the East Fork Parachute Creek and Trapper/Northwater Creek drainages.

Site-specific locations for ground-disturbing activities may be permitted if BLM determines that the requested activity would not impair values associated with WSRA designation. In making this determination, BLM will consider the following resource factors: type and location of outstandingly remarkable values (ORVs); the type, amount, and duration of the surface disturbance; the relative extent of ORVs; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect ORVs, or which may affect the outcome of a suitability study. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

On the lands described below:

EXHIBIT GS-NSO-ROAN-22

Lease Number:

STEEP SLOPES GREATER THAN 50 PERCENT

To protect soil stability and reduce the impacts of erosion, no ground-disturbing activities will be authorized on slopes steeper than 50%. No ground-disturbing activities will be approved in areas of steep slopes that also are designated as wildlife movement corridors. No ground-disturbing activities will be approved in areas with slopes steeper than 50% to allow access to areas with slopes less than 50%.

On the lands described below:

GS-NSO-ROAN-23

Lease Number:

RIPARIAN AND WETLAND HABITAT

To maintain proper hydrologic function and protect adjacent riparian and wetland areas that provide habitat for special-status fish and wildlife species, waterfowl and shorebird production, and amphibian breeding/feeding or that provide important water quality, scenic, or values, no ground-disturbing activities will be permitted in areas having these characteristics. Ground-disturbing activities, including oil and gas facilities, roads, pipelines, electric transmission lines, communication facilities, and other sources of surface disturbance, will be limited to areas beyond (outside) the outer edge of riparian or wetland vegetation.

A ground-disturbing activity may be permitted if BLM determines that (a) the activity would not cause loss of riparian vegetation or, if riparian vegetation is lost, that the loss would be limited to no more than 0.1 acre and 100 lineal feet per mile of stream; (b) any temporarily disturbed areas could be revegetated with existing or similar species, including use of containerized nursery stock to replace woody plants on a one-to-one basis (trees) or area-for-area basis (shrubs); (c) revegetation success could be achieved within 2 years; (d) the activity would not impair water quality, flow regime, aquatic habitat quality, and channel and bank stability; and (e) no practicable alternative is available. Resource factors include topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or enhancement of the resource values. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years. In such instances, approval must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal to that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above factors.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-NSO-ROAN-24

Lease Number:

THREATENED, ENDANGERED, OR CANDIDATE SPECIES HABITAT

To protect occupied habitat and immediately adjacent potential habitat crucial for the maintenance or recovery of species listed under the Endangered Species Act or by the State of Colorado as threatened or endangered (including proposed or candidate species under the ESA), no ground-disturbing activities will be authorized within occupied habitat or immediately adjacent potential habitat necessary for maintenance or recovery of the species.

A ground-disturbing activity may be permitted if BLM determines, following Section 7 consultation with USFWS for Federally listed or proposed threatened or endangered species or with CDOW for State-listed species, that the requested activity would not impair values associated with maintenance or recovery of the species. In making this determination, BLM will consider the following resource factors: behavioral and ecological requirements of the species; the type, amount, and duration of the surface disturbance; the relative extent of available habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or recovery of the species or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

If a species affected by this stipulation is removed from the Federal list, this stipulation would no longer apply to that species. However, other requirements would apply if the species remains classified as sensitive or is otherwise protected.

On the lands described below:

EXHIBIT GS-NSO-ROAN-25

Lease Number:

RAPTOR NEST SITES

To protect nesting of raptors not protected by the Endangered Species Act or other species-specific stipulation, no ground-disturbing activities will be permitted within 0.125 mile of an active nest (i.e., containing eggs or young or being attended by adults in preparation for nesting).

A ground-disturbing activity may be permitted if BLM determines, following consultation with CDOW, that (a) the specific activity or requested change would not impair behaviors, habitat use and quality, and reproductive success of raptor species present within the specific NSO area; and (b) no practicable alternative is available. In making this determination, BLM will consider the behavioral and ecological requirements of the species; the type, amount, intensity, and duration of the surface disturbance; the relative extent of available habitat; the effects on both individuals of the species and supporting habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, intensity, and duration of potential adverse effects; mitigation measures proposed to avoid, minimize, or offset the adverse effects; and other factors that may affect the species, or cause habitat to become unusable.

Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-NSO-ROAN-27

Lease Number:

WILDLIFE SECURITY AREAS BELOW THE RIM

To protect important wildlife security areas, especially those for deer and elk, no ground-disturbing activities will be permitted in areas that provide high-value habitats along and below the Roan Cliffs.

A ground-disturbing activity may be permitted if BLM determines, following consultation with CDOW, that the requested activity would not impair values associated with maintenance of the species of interest. In making this determination, BLM will consider the following resource factors: behavioral and ecological requirements of the species; the type, amount, and duration of the surface disturbance; the relative extent of available habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or recovery of the species or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-NSO-ROAN-28

Lease Number:

HIGH VALUE SPECIAL STATUS FISH SPECIES HABITAT

To protect Colorado River cutthroat trout from direct and indirect impacts in high value habitat, no ground-disturbing activities that would result in loss or degradation of areas designated as high value habitat for Colorado River cutthroat trout will be permitted.

Prior to implementing any ground-disturbing activity or other project component in the area covered by this stipulation, the proponent must provide an assessment of potential impacts if any, to this resource value. The assessment will be based on current baseline data; the type, location, duration, and intensity of potential adverse effects; and mitigation measures proposed to avoid, minimize, or offset the adverse effects.

A ground-disturbing activity may be permitted if BLM determines, following consultation with CDOW, that the requested activity would not impair values associated with maintenance of the species of interest. In making this determination, BLM will consider the following resource factors: habitat conditions needed for feeding, spawning, survival of eggs and larvae, and refugia during high or low flow. Impairment could include siltation of substrate, changes in flow regime (e.g., localized damming), loss of overhanging vegetation canopy, reduction in bank stability, reduction in water quality, and direct mortality of trout or trout eggs, behavioral and ecological requirements of the species; the type, amount, and duration of the surface disturbance; the relative extent of available habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or recovery of the species of interest or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases, approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-NSO-ROAN-30

Lease Number:

I-70 VIEWSHED (VRM CLASS II)

To protect areas with high visual sensitivity within 5 miles of I-70, no ground-disturbing activities on slopes steeper than 30% with high visual sensitivity in the I-70 viewshed will be permitted. These are lands within 5 miles of the highway, of moderate to high visual exposure, where details of vegetation and landform are readily discernible, and changes in contrast can be easily noticed by the casual observer on I-70.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with VRM Class II objectives or degrade the visual characteristics of the viewshed below Class II standards. In making this determination, BLM will consider the following resource factors: retention of the overall landscape character on both a site-specific and cumulative basis including line, form, color, and texture; the extent to which the activity blends with characteristics of the natural landscape; the type, amount, and duration of the surface disturbance; the relative extent of viewshed characteristics and current conditions; the relationship to topography and vegetation screening; the type, location, duration, and intensity of potential adverse effects including line, form, color, and texture; mitigation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect the visual and aesthetic quality. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-ROAN-NSO-31

Lease Number:

EAST FORK FALLS VIEWSHED (VRM CLASS I)

To preserve the existing character of the landscape to meet VRM Class I objectives in areas designated as very high or high visual sensitivity (East Fork Falls), no ground-disturbing activities will be authorized that would cause landscape modifications that violate VRM Class I objectives or interfere with natural ecological changes in landscape character and scenic quality.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with VRM Class I objectives or degrade the visual characteristics of the viewshed below Class I standards. In making this determination, basis including line, form, color, and texture; the extent to which the activity blends with characteristics of the natural landscape; the type, amount, and duration of the surface disturbance; the relative extent of viewshed characteristics and current conditions; the relationship to topography and vegetation screening; the type, location, duration, and intensity of potential adverse effects including line, form, color, and texture; mitigation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect the visual and aesthetic quality. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-04

Lease Number:

EROSIVE SOILS AND SLOPES GREATER THAN 30%

To minimize impacts to highly erosive soils, BLM may require special design, construction, operation, mitigation, or reclamation measures and relocation by more than 200 meters to protect the soil resource, minimize impacts to other resources, and ensure reclamation success in areas of highly erosive soils on slopes steeper than 30%. Highly erosive soils are those mapping units in the “severe” or “very severe” erosion classes based on Natural Resources Conservation Service (NRCS) mapping or other existing sources of information.

A ground-disturbing activity may be permitted if BLM determines that it would not impair values associated with soil stability and productivity. In making this determination, BLM will consider the following resource factors: soil stability and productivity; minimization of soil erosion; site-specific conditions; the type, amount, and duration of the surface disturbance; the relationship to topography and vegetative cover; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect soil stability. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) which considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-07

Lease Number:

RIPARIAN AND WETLAND HABITAT

To maintain proper hydrologic function and protect adjacent riparian and wetland areas that provide habitat for special- status fish and wildlife species, waterfowl and shorebird production, and amphibian breeding/feeding or that provide important water quality, scenic, or recreation values, BLM may require special design, construction, operation, mitigation, or reclamation measures, relocation by more than 200 meters for any ground-disturbing activities, electric transmission lines, and other sources of disturbance within 500 feet of riparian or wetland vegetation to protect the values and functions of these areas. Measures required will be based on the nature, extent, and value of the area potentially affected.

BLM will consider the following resource factors: proper hydrological and ecological functioning; protection of habitat supporting the fish and wildlife resources; ecological requirements to maintain the riparian area; the type, amount, and duration of the surface disturbance; the relative extent and condition of the riparian area; the relationship to topography and surrounding vegetation; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or condition of the riparian area. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-08

Lease Number:

PEREGRINE FALCON CLIFF-NESTING COMPLEX

To protect peregrine falcon cliff nesting complex, ground-disturbing activities may be relocated outside of the cliff-nesting complex along the Roan Cliffs.

Site-specific locations for ground-disturbing activities may be allowed within the CSU only if, following consultation with CDOW, BLM determines that the specific activity or requested change would not impair behaviors, habitat use and quality, and reproductive success of Peregrine falcon present within the area. In making this determination, BLM will consider the status of the nest (active or inactive); behavioral and ecological requirements of the species; the type, amount, intensity, and duration of the surface disturbance; the relative extent of available habitat; the effects on both individuals of the species and supporting habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, intensity, and duration of potential adverse effects; mitigation measures proposed to avoid, minimize, or offset the adverse effects; and other factors that may affect the species, or cause habitat to become unusable.

Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-09

Lease Number:

WILDLIFE SECURITY AREAS ABOVE THE RIM

To protect important security for wildlife, especially deer and elk ground-disturbing activities may be relocated more than 200 meters to avoid wildlife security areas above the rim.

Specific locations for ground-disturbing activity may be permitted if BLM determines, following consultation with CDOW, that the requested activity would not impair values associated with maintenance of the species of interest. In making this determination, BLM will consider the following resource factors: behavioral and ecological requirements of the species; the type, amount, and duration of the surface disturbance; the relative extent of available habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or recovery of the species or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-10

Lease Number:

BIG GAME MIGRATION CORRIDORS

To protect contiguity and extent of big game migration corridors, ground-disturbing activities may be relocated more than 200 meters to avoid big game migration corridors.

A ground-disturbing activity may be permitted if BLM determines, following consultation with CDOW, that the requested activity would not impair values associated with big game migration corridors. In making this determination, BLM will consider the following resource factors: behavioral and ecological requirements of big game species; the type, amount, and duration of the surface disturbance; the relative extent of available habitat; the relationship to topography and vegetation screening; current baseline data; the type, location, duration, and intensity of potential adverse effects; mitigation and conservation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect maintenance or recovery of the species or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-12

Lease Number:

HABITAT FOR SPECIAL STATUS PLANT SPECIES POPULATIONS AND SIGNIFICANT PLANT COMMUNITIES

Protect and maintain the habitat and ecological processes that support special status plants and significant plant communities, BLM may require special design, construction, operation, mitigation, or reclamation measures, and/or relocation by more than 200 meters for any ground-disturbing activities, electric transmission lines, and other sources of disturbance within a watershed that would disturb, alter, or interrupt the hydrologic or ecological processes that support special status plant species or significant plant communities.

Site-specific locations for ground-disturbing activities may be allowed within the CSU only if BLM determines that the specific activity or requested change would not impair species health and ecological function of associated habitat. In making this determination, BLM will consider the status of the population; ecological requirements of the species; the type, amount, intensity, and duration of the surface disturbance; the relative extent of the population or community; the effects on both individuals of the species and populations; the relationship to topography and other vegetation; current baseline data; the type, location, intensity, and duration of potential adverse effects; mitigation measures proposed to avoid, minimize, or offset the adverse effects; and other factors that may affect the species or community. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-13

Lease Number:

PARACHUTE CREEK HIGH VALUE WATERSHED AND WMA

To ensure protection of overall hydrologic function, ecosystem stability, functionality of wildlife habitat and botanical habitats, and enhancement of fisheries habitat; while making lands available for oil and gas leasing in an environmentally sound manner, under multiple use management.

Provide resource protections through actions that minimize disturbance, habitat fragmentation, and protect key habitats from disturbance; while providing for oil and gas leasing accordance with the Mineral Leasing Act (MLA) and the Federal Onshore Oil and Gas Leasing Reform Act (FOOGLRA) of 1987 (Reform Act) and applicable regulations under 43 CFR 3100 and in accordance with the decisions made through application of the Federal Land Policy and Management Act (FLPMA) and other laws applicable to public lands.

Condition the development of oil and gas through sequencing and clustering of development, consolidation of disturbance and facilities, limiting the amount of unreclaimed disturbance, and limiting development and associated disturbance to the less environmentally sensitive ridge tops.

Prior to exploration and/or lease development within the planning area, the operator must submit a Master Development Plan (MDP) identifying projected activity (including well locations, pipelines, and facilities) during the subsequent 2 to 5 years and appropriate mitigation.

All oil and gas operations and activities on top of the plateau will be under the control of a single operator; BLM will directly control and manage the timing, location, and type of all operations by that single operator in accordance with the following decisions:

- Oil and gas development activities will be restricted to six specific development areas (Figure 2-1) along ridge tops on slopes less than 20 percent.
- Operations will be staged and sequenced over time.
- Development activities will be allowed on only one of six development areas at a time (See Figure 2-1); exploratory wells may be drilled in other areas sufficient to plan future drilling operations.
- Total unreclaimed surface disturbance will be limited to 350 acres at any given time.
- Five-year interim reclamation standards must be met on 90 percent or more of disturbed lands within any given development area, as determined by BLM, prior to development operations being allowed in another development area.
- Drilling pads will be a minimum of approximately 2,640 feet apart; and development and production facilities will be clustered and designed to minimize surface impacts.
- Limit open and administrative motorized routes to approximately 138 miles. Allow exceptions only where necessary to reduce impacts, such as using a longer route to avoid a sensitive resource or reduce visual impacts and direct habitat loss.
- Implement innovative reclamation and performance-based monitoring standards.
- Consolidate natural gas production facilities, roads, pipelines, and staging areas along roadways to minimize disturbance.
- Apply the resources protections detailed in this table, and in Tables 2-1, 2-2, and C-1. This includes NSO, CSU, and TL lease stipulations and any COAs that are current at the time of permitting.

EXHIBIT GS-CSU-ROAN-13 (Continued)

Lease Number:

- Before any on-the-ground lease operations are considered for approval by BLM on top of the plateau, lessees will reach formal agreement on one operator to conduct all operations on behalf of all the lessees. All lessees/leases will join a Federal Unitization Agreement, approved by BLM. The Unitization Agreement will be non-contracting. The agreement will allow BLM to directly control and manage the timing, location and type of all operations occurring on the entire top of the plateau. In effect, all of the leases will act administratively as a single lease. BLM will work with just one operator for the life of all oil and gas operations occurring on the top of the plateau. The Federal Unitization Agreement will (among other things) identify the agreed upon single operator and provisions on how to allocate the benefits of gas and/or production to all of the leases.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with the WMA. In making this determination, BLM will consider the following resource factors: protection of ecological, hydrological, and habitat functions and resources; the type, amount, and duration of the surface disturbance; relationship to naturally occurring conditions; topography; type, location, duration, and intensity of potential adverse effects; mitigation measures to avoid, minimize, or offset any adverse effects; and other factors that may affect the paleontological resource. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

BLM will determine what level of protection available under this stipulation is required to protect Colorado River cutthroat trout and habitat, rare and/or significant natural plant communities, and municipal water supply and quality. BLM's determination would be based on site-specific conditions and the type, amount, and duration of the associated impacts.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-14

Lease Number:

VRM CLASS II AREAS BELOW THE RIM

To preserve the existing character of the landscape to meet VRM Class II objectives in all areas designated at this class, BLM may require special design, construction, operation, mitigation, or reclamation measures, or relocation by more than 200 meters to retain the existing landscape character and allow only limited changes.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with VRM Class II objectives or degrade the visual characteristics of the portion of the viewshed below Class II standards. In making this determination, BLM will consider the following resource factors: retention of the overall landscape character on both a site-specific and cumulative basis including line, form, color, and texture; the extent to which the activity blends with characteristics of the natural landscape; the type, amount, and duration of the surface disturbance; the relative extent of viewshed characteristics and current conditions; the relationship to topography and vegetation screening; the type, location, duration, and intensity of potential adverse effects including line, form, color, and texture; mitigation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect the visual and aesthetic quality. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-15

Lease Number:

VRM CLASS III ABOVE THE RIM

To preserve the existing character of the landscape to meet VRM Class III objectives in all areas designated at this class above the rim, BLM may require special design, construction, operation, mitigation, or reclamation measures, or relocation by more than 200 meters.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with VRM Class III objectives or degrade the visual characteristics of the viewshed below Class III standards. In making this determination, BLM will consider the following resource factors: partial retention of the overall landscape character on both a site-specific and cumulative basis including line, form, color, and texture; the extent to which the activity blends with characteristics of the natural landscape; the type, amount, and duration of the surface disturbance; the relative extent of viewshed characteristics and current conditions; the relationship to topography and vegetation screening; the type, location, duration, and intensity of potential adverse effects including line, form, color, and texture; mitigation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect the visual and aesthetic quality. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

On the lands described below:

EXHIBIT GS-CSU-ROAN-16

Lease Number:

HUBBARD MESA OHV RIDING AREA

To protect recreation opportunities within the Hubbard Mesa Riding Area, BLM may require special design, construction, operation, mitigation, and reclamation measures, including relocation by more than 200 meters, to protect recreation opportunities and settings in the SRMA.

A ground-disturbing activity may be permitted if BLM determines that the requested activity would not impair values associated with OHV riding opportunities within the Hubbard Mesa area. In making this determination, BLM will consider the following resource factors: existing OHV use; existing OHV riding opportunities; anticipated future use; management of OHV use; type, amount, and duration of the surface disturbance; the relative extent of OHV use and current conditions; the relationship to topography and vegetation screening; the type, location, duration, and intensity of potential adverse effects; mitigation measures to avoid, minimize, or offset the adverse effects; and other factors that may affect OHV riding opportunities. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures as approved by BLM shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

Lease Number:

SHARRARD PARK PALEONTOLOGICAL RESOURCES

To protect, preserve, or recover the scientifically significant fossil resources in this area, BLM may require special survey, design, construction, operation, and reclamation measures, or relocation by more than 200 meters in identified portions of Wasatch Formation outcrops in Sharrard Park. Prior to any ground-disturbing activity, the operator shall have the paleontological resources surveyed within 200 feet of the proposed disturbance, to be performed by a BLM-approved paleontologist. Other special measures include requirements that (a) onsite personnel are informed of the potential for fossils, (b) notify BLM if any fossils are found, and (c) do not disturb fossils in any way. Site-specific ground-disturbing activities may be permitted if BLM determines that the requested activity would not impair values associated with paleontological resources. In making this determination, BLM will consider the following resource factors: protection of paleontological resources; preservation of paleontological resources, recovery of paleontological resources; the type, amount, and duration of the surface disturbance; the relative extent of paleontological resources and current conditions; the relationship to naturally occurring protections or risks to the paleontological resource; topography; type, location, duration, and intensity of potential adverse effects; mitigation measures to avoid, minimize, or offset any adverse effects; and other factors that may affect the paleontological resource.

Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

EXHIBIT GS-TL-ROAN-13

Lease Number:

BIG GAME WINTER RANGE

To protect and maintain physical and biological components important to deer and elk winter range and the obligate species, both on Federal lands, and across the landscape as a whole, as opportunities present, surface disturbance and human activities that lessen the quality of the deer and elk winter range will not be allowed from **December 1 through April 30**. Ongoing drilling and other activities and operations shall be designed and implemented such that the well bore is adequately secured and that all drilling and surface disturbing operations shall cease by December 1 in important and critical deer and elk winter habitats. In the event of unforeseeable and unplanned events, extensions not exceeding two weeks in duration may be authorized to ensure safe shut down of drilling operations, and conservation of mineral resources. Human activities including visitations for production activities and well monitoring during the December 1 to April 30 timeframe shall be designed and carried out to minimize impacts. This includes well monitoring through telemetry, scheduling of all non-emergency well maintenance activities outside the December 1 to April 30 timeframe, conducting unavoidable and necessary on-the-ground visits between the hours 10:00 a.m. and 3:00 p.m., and minimizing on-the-ground visitations.

Site-specific ground-disturbing activity between December 1 and April 30 may be allowed if BLM determines, following consultation with CDOW, that the requested activity would not impair values associated with the quantity and quality of the winter range for the species of interest. In making this determination, BLM will consider the following resource factors: minimization of the footprint of activities; fragmentation; impacts to winter range across the planning area as a whole; effectiveness of voluntary offsite mitigation of habitat with respect to quantity, quality and duration of both the surface disturbing activity and mitigation; the relative extent of available winter range; relationship to topography and vegetation screening; current baseline data; the type, location, duration, and factors that may affect the winter range or cause winter range to become unusable. Approval of ground-disturbing activities granted in any given year does not constitute approval for subsequent years; in such cases approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

This timing restriction limitation does not apply, and the restriction may be considered to be met, if BLM determines, following consultation with CDOW, that animals are not using the habitat and are not likely to utilize the habitat in a particular season, and that activities will not lessen overall habitat quality in future years.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

Lease Number:

RAPTOR NEST SITES

To protect nesting and fledging habitat for raptors not protected by species-specific measures. This includes owls, northern harrier, accipiters, buteos, golden eagle, osprey, and falcons except the American kestrel. Within a 0.125-mile radius of a nest, no activities or other sources of disturbance with the potential to cause nest failure, abandonment, or mortality of fledglings. Stipulations will be applied annually from **February 1 through August 15.**

A ground-disturbing activity between February 1 and August 15 may be allowed if BLM determines, following consultation with USFWS that the requested activity would not impair values, behaviors, or habitat associated with nesting and fledging. In making this determination, BLM will consider the following resource factors: the status of the nest (active or inactive); the potential to cause the nest to not be used, to be abandoned, or otherwise lead to mortality of eggs or nestlings; behavioral and ecological requirements of the species; the type, amount, intensity, and duration of the proposed surface disturbance; the relative extent of available nesting and fledgling habitat; relationship of the nest and the proposed ground-disturbing activity to topographic and vegetational screening; current baseline data; mitigation measures proposed to avoid, minimize, or offset any adverse effects; and other factors that may affect the species or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

Lease Number:

PEREGRINE FALCON CLIFF-NESTING COMPLEX

To protect nesting and fledging habitat of this State-listed threatened species, no activities or other sources of disturbance that could cause abandonment of a nest or established territory will be allowed within a 0.5-mile radius of the cliff-nesting complex on the Roan Cliffs, Stipulations will be applied annually, **March 15 through July 31.**

Site-specific ground-disturbing activity between May 15 and July 31 may be allowed if BLM determines, following consultation with CDOW, which the requested activity would not impair values, behaviors, or habitat associated with nesting and fledging. In making this determination, BLM will consider the following resource factors: meteorological or ecological conditions during the period requested; the status of the nest (active or inactive); potential to cause the nest not to be used or lead to nest failure; abandonment of the nest; mortality of fledglings; behavioral and ecological requirements of the species; the type, amount, intensity, and duration of the surface disturbance; the relative extent of available nesting and fledgling habitat; relationship to topography and vegetation screening; current baseline data; the type, location, intensity, and duration of potential adverse effects; mitigation measures proposed to avoid, minimize, or offset the adverse effects; and other factors that may affect the species, or cause habitat to become unusable. Approval of ground-disturbing activities in any given year does not constitute approval for subsequent years; approval for such activities must be granted (or extended) annually by BLM. The proponent of any ground-disturbing activity must provide an assessment with the proposal that (a) documents anticipated compliance or non-impairment of resource values protected by this stipulation and (b) considers the resource factors mentioned above.

During and following the project activities covered by this provision, ongoing monitoring data shall be collected by the proponent using widely accepted scientific methods and reported to BLM not less often than annually. If unanticipated types or levels of adverse effects are noted during monitoring, BLM shall be promptly notified, and corrective measures, as approved by BLM, shall be identified and implemented by the proponent. This information will be used through an adaptive management process to refine the project components and associated mitigation measures to be applied to future proposed activities.

**LEASE NOTICE
OTHER REQUIRED CONDITIONS OF APPROVAL**

To alert lessee of all potential COAs applied to permitted activities in addition to lease level stipulations by the Proposed Plan. These take the form of management prescriptions specific to defined areas, Best Management Practices (BMPs) specific to resource values, required reclamation standards and monitoring.

Lessees and potential lessees are hereby advised of COAs, or standards that will be achieved through the use of COAs, and the location of land use management prescriptions in the Proposed Plan.

The Proposed RMPA/Final EIS contains: general management goals, objectives, and actions for this Planning Area in Table 2-1; management prescriptions for ACECs in Table 2-2; management goals, objectives, and actions for the Parachute Creek Watershed Management Area (WMA) in Table 2-3.

Descriptions of applicable Best Management Practices and Standard Reclamation Practices are located in Appendix I of the Proposed Plan/Final EIS.

Disturbed Site Reclamation Monitoring and Success Criteria are located in Appendix J of the Proposed Plan/Final EIS.
