

## **CHAPTER 6**

### **CONSULTATION AND COORDINATION**

---

#### **6.1 PUBLIC PARTICIPATION SUMMARY**

---

##### **6.1.1 Public Scoping Period and Meetings**

###### **6.1.1.1 Initial Scoping**

The public was provided a 30-day scoping period at the beginning of the EIS process to identify potential issues and concerns associated with the Proposed Action. The NOI for the Blackfoot Bridge Mine EIS was published in the Federal Register on February 3, 2006. The notice announced the agencies' intent to conduct an environmental analysis of phosphate ore mining at the Blackfoot Bridge property. It also announced the dates of February 28 and March 1, 2006 for two public meetings to solicit and receive comments on the proposed project. A copy of this NOI is included in the scoping summary report (Greystone 2006e). The public was solicited for feedback by invitation to public meetings, announced in local newspapers and broadcast on public radio. A notice was published on February 9, 2006 in the Caribou County Sun newspaper and on February 12, 2006 in the Idaho State Journal newspaper. In addition, a news release was published in the Idaho State Journal on February 4, 2006. KBYI Radio aired a news release multiple times prior to the public meetings.

The public mailing list was compiled, and 274 letters sent to interested individuals, agencies, and groups. The EIS scoping mailing list is included in the Scoping Summary Report (Greystone 2006e).

Public meetings were held in Soda Springs (February 28, 2006) and Pocatello, Idaho, (March 1, 2006) to discuss the proposal and receive comments from the public. Both meetings were conducted in an open-house format, with representatives of the BLM, IDEQ, IDL, and the third-party EIS contractor (Greystone) in attendance and provided information, project handouts, answered questions, and solicited comments from participants. Lists of individuals who signed attendance sheets at the public meetings are included in the Scoping Summary Report (Greystone 2006e).

Comments were requested to be received on or before March 31, 2006. By the close of the scoping period on March 31, 2006, six comment letters, six comment sheets, and two e-mails had been received for the Blackfoot Bridge Mine project. In addition, one comment e-mail was received after the end of the scoping period for a total of 15 comments. Copies of all written comment letters, forms, and e-mails are included in the Scoping Summary Report (Greystone 2006e).

Concerns expressed in these comments included:

- Proximity of the project to the Blackfoot River and the impacts on water quality and fisheries;

- Potential for selenium contamination of the environment;
- Permanent changes to the landscape resulting from mining;
- Impacts to threatened, endangered, and sensitive species and habitats including big game and grouse;
- Effects of increased traffic on roads near the mine;
- Loss of access to public lands;
- Cumulative impacts of the project.

Comments received in response to solicitations are part of the public record for this Proposed Action and available for public inspection. The mailing list for the project was revised to include persons that provided comments in response to scoping, requested to be on the mailing list, or signed a scoping meeting list.

### **6.1.2 EIS Mailing List**

An EIS mailing list of interested persons was initially assembled from mailing lists maintained at the BLM Pocatello Resource Area Office. This list was supplemented by addresses of scoping participants. Additional parties that have been added to the mailing list as individuals or groups have contacted the agencies. The mailing list for the DEIS will be adjusted accordingly. After comments are received on the DEIS, the addresses of substantive commenters will be added to the FEIS mailing list.

### **6.1.3 Distribution of the Draft EIS**

A 45-day review period will be initiated by publication of the Notice of Availability (NOA) for the DEIS in the Federal Register.

The DEIS will be distributed as follows:

- An NOA will be published in the Federal Register specifying dates for the comment period and the date, time, and location of the public meetings.
- A news release announcing availability of the DEIS will be provided by BLM at the beginning of the 45-day comment period to the same news organizations as for the initial public scoping announcement.
- The DEIS will be distributed to interested parties identified in the EIS mailing list, as described above, and made available via the internet.

Public meetings will be held to obtain comments on the DEIS and to answer questions that the public has regarding the project or the EIS process.

### **6.1.4 Walla Walla District, Corps of Engineers Permit Evaluation**

Concurrent with the NOA for the DEIS, the USACE will prepare and transmit to the general public and the DEIS distribution list a public notice describing the applicant's proposal to

conduct work in waters of the U.S. for which a Section 404 Clean Water Act permit has been requested. The USACE Public Notice will also serve as public notice that IDEQ is evaluating whether to certify that the discharges of dredged and fill material proposed for this project would not violate existing water quality standards. A Section 404 Clean Water Act permit would not be issued until water quality certification has been issued or waived by the IDEQ, as required by Section 401 of the Clean Water Act. If water quality certification is not issued, waived, or denied within 60 days of the public notice date, and an extension of this period is not granted to the IDEQ, certification would be considered waived. Additionally, within (30) days of this public notice, any person may provide written comments to IDEQ and/or request in writing that IDEQ provide them notice of their preliminary 401 certification decision. Comments concerning certification for this project should be mailed to: Mr. Bruce Olenick, Regional Administrator, Idaho Department of Environmental Quality, 444 Hospital Way, #300, Pocatello, Idaho 83201.

The USACE will participate and co-sponsor public meetings held for the DEIS and incorporate comments received into the USACE permit evaluation process and public record.

### **6.1.5 Final EIS Distribution**

The FEIS will be distributed after evaluation of comments received on the DEIS. A 30-day FEIS review period will be initiated by publication of the NOA for the FEIS in the Federal Register and in local newspapers. The FEIS will be released as follows:

- The NOA will be published in the Federal Register.
- Copies of the FEIS will be sent to addresses on the updated mailing list and made available via the internet.
- A news release notifying the public of availability of the FEIS will be issued to the same newspapers used for previous project announcements.

### **6.1.6 Record of Decision**

Subsequent to the 30-day review period for the FEIS, the BLM will prepare a ROD for distribution to people and organizations identified on the updated project mailing list. An NOA will be published in the Federal Register. A news release notifying the public of the ROD will be provided to the same newspapers used for previous project announcements.

### **6.1.7 Walla Walla District, Corps of Engineers Permit Decision**

A Joint Application for permit has been submitted to the USACE for review and approval under Section 404 of the Clean Water Act and to the State of Idaho under Section 401 of the Clean Water Act. The USACE is a cooperating agency and intends to adopt the FEIS in exercising its regulatory authority to make a permit decision. This permit decision will include a Section 404(b)(1) evaluation under 40 CFR Part 230. The USACE permit decision will be independent of decisions made by the BLM or other agencies.

---

## **6.2 PUBLIC INPUT**

---

Comments received by the BLM on the DEIS will be reviewed and evaluated by the agencies to determine if information provided in the comments requires formal response or contains new data that identify deficiencies in the EIS. Steps will be initiated to correct any such deficiencies and to incorporate information into the FEIS.

### **6.2.1 Consultation with Others**

The following state and federal agencies were consulted during preparation of this EIS:

Idaho Conservation Data Center  
Idaho Department of Environmental Quality  
Idaho Department of Fish and Game  
Idaho Department of Lands  
Idaho Department of Water Resources  
Idaho State Historic Preservation Office  
U.S. Army Corps of Engineers  
U.S. Environmental Protection Agency  
U.S. Fish and Wildlife Service  
U.S. Geological Survey

The following Tribal organizations were consulted:

Shoshone-Bannock Tribes, Fort Hall Business Council

### **6.2.2 Consultation with Idaho Department of Environmental Quality and Idaho Department of Lands**

The BLM requested that the IDEQ and IDL be cooperating agencies for this project. The IDEQ and IDL accepted this status, and BLM coordinated with these agencies during the preparation of the DEIS and when reviewing information in the EIS. The IDEQ and IDL participated in conference calls and meetings as needed.

### **6.2.3 Consultation with the Walla Walla District, Corps of Engineers**

The BLM has requested that the USACE be a cooperating agency in preparation of the EIS. USACE accepted this status, and the BLM coordinated with the USACE during the preparation of the DEIS and when reviewing the information in this EIS. The USACE participated in conference calls and meetings as needed.

---

## **6.3 GOVERNMENT TO GOVERNMENT CONSULTATION**

---

The Shoshone-Bannock Tribes have reserved treaty rights on the public domain lands, in this case, administered by the BLM. The relationship of the United States government with American Indian tribes is based on legal agreements between sovereign nations. The Fort Bridger Treaty of July 3, 1868 reserved hunting and fishing rights for Tribal members on "...all

unoccupied lands of the United States.” Consultation with the Fort Hall Business Council of the Shoshone-Bannock Tribes is required on land management activities that could affect public land uses and access to the land by tribal members. A comment letter from the Fort Hall Business Council regarding the Public Scoping Notice for the proposed Blackfoot Bridge Mine was received by the BLM in March 2006. A formal government-to-government consultation meeting was held on May 27, 2009 between the agencies and the Tribes.

## 6.4 LISTS OF PREPARERS AND REVIEWERS

**Lead Agency:** BLM, Pocatello Field Office

**Cooperating Agencies:** IDEQ, IDL, USACE

**Interdisciplinary Team and Technical Specialists:**

**Table 6.4-1 BLM, Pocatello Field Office**

<b>Name</b>	<b>Project Responsibility</b>	<b>Education/Experience</b>
Kyle Free	EIS Project Lead, Mining Engineer:	B.S. Mining Engineering M.S. Mining Engineering 11 years experience
