The Bureau of Land Management's Upper Snake Field Office of the Idaho Falls District, Idaho, wishes to make its completed *Analysis of the Management Situation (December 2009)* document available in various venues for the public for informational purposes. This document is being distributed to several public libraries and BLM offices across Idaho. It is also available on the internet at

http://www.blm.gov/id/st/en/fo/upper_snake/Planning/upper_snake_rmp.html.

We appreciate you receiving this document and making it available to the public. This document is the first step in the planning process for the field office's new comprehensive resource management plan. The document is of public interest because it summarizes the field office's current management guidance and the area's unique biological, physical, social, and economic qualities.

The Upper Snake Field Office is responsible for managing resources and uses across 1.8 million acres of public lands in 12 southeastern Idaho counties and one county in Wyoming. These public lands are intermixed with private, state and other federally managed lands. It is the mission of the Bureau of Land Management to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

If you have questions, please feel free to contact the Upper Snake Field Office at (208) 524-7500.

Sincerely,

Terry Lee Smith
Upper Snake FO Planning Project Manager
