Source Information: Land status, hydrography, and transportation data compiled from Bureau of Land Management (BLM) resource base data at a scale of 1:24,000. Contours derived from scanned U.S. Geologic Survey 1:24,000 scale contour bases. The official land records should be checked for up-to-date status on any specific tract of land. Recreation information provided by Owyhee, Jarbidge and Jordan BLM Field Offices.

**WARNING:** Inclement weather can make road surfaces impassable. Travel on unpaved routes should only be made in properly equipped vehicles and under good weather conditions. This is an extremely remote region. Plan ahead. Take precautions. Patrols are infrequent. Some roads cross private land and permission from landowners may be required for access.

Even though every effort is made to depict the road network, features and descriptions accurately, BLM cannot guarantee road classification and/or positional accuracy of roads and other features in all cases. No warranty is made by the BLM for use of this data for purposes not intended by the BLM.
