

### Mobile Attack

<b>Location:</b>		<b>Date:</b>	
<b>Module:</b>		<b>Reviewed by:</b>	
<b>Drill Parameters</b>	<p>The drill evaluator will denote a location and conditions for a simulated fire. The drill evaluator will brief the engine module away from the location on the specific conditions of the simulated fire.</p> <p>The drill evaluator can also add components such as shelter deployment, or the Spot Fire Drill Checklist.</p>		
<b>Performance Expectation</b>	<p>The Engine Module will utilize proper water pressure, hose, and spacing for the given fuel type to perform a mobile attack within the parameters listed above.</p>		
<b>Equipment</b>	<p>Engine, PPE &amp; Line Gear.</p>		
<b>Key Code: E = Exceeds Standard M = Meets Standard NI = Needs Improvement</b>			
	<b>Task</b>	<b>Code</b>	<b>Remarks</b>
1.	The deployment of personnel takes place in a professional and timely manner.		
2.	All personnel are wearing appropriate PPE.		
3.	The Engine Captain uses sound basic suppression techniques and has a contingency plan.		
4.	The Engine Captain updates this plan, and informs the team and supervisors of changes as needed thru out operations.		
5.	Proper positioning of engine during the attack.		
6.	<p>The engine operator is familiar with the pumping system.</p> <p>a. Proper pressure for assignment.</p> <p>b. Proper use of foam mix for assignment.</p>	<p>a.</p> <p>b.</p>	
7.	Module members communicated hazards and changes in operations in a professional manner.		
8.	Module members worked in a professional and safe manner with proper spacing, awareness of hose and hazard location, each other and path of the engine.		
9.	Driver has visibility of all personnel at all times during the drill.		
10.	All personnel display training and familiarly with the equipment and in the skills needed for their assignment.
