

We want to thank everyone who participated in the public scoping meeting and/or submitted comments during the public scoping process. Each comment form or letter received was read and analyzed to identify the preliminary issues that will be addressed in the Resource Management Plan (RMP) and Environmental Impact Statement (EIS). The results of the scoping process are documented in the Prehistoric Trackways National Monument (PTNM) RMP/EIS Scoping Report, which can be viewed at [http://www.blm.gov/nm/st/en/fo/Las\\_Cruces\\_District\\_Office/trackways\\_rmp.html](http://www.blm.gov/nm/st/en/fo/Las_Cruces_District_Office/trackways_rmp.html) or a hard copy is available for review at the Las Cruces District Office, located at 1800 Marquess Street, Las Cruces, New Mexico.

The comments and issues identified through scoping assisted in determining the scope of the studies to be completed and addressed in the RMP/EIS. Based on this information and the enabling legislation, BLM is looking for opportunities to modify some of its current management within the PTNM. Preliminary range of reasonable alternative management strategies, including an alternative to continue BLM's existing management are available for review now and are the focus of this public workshop.

If you have any comments on the preliminary alternatives, please fill out and return this form by **October 15, 2010**. Additional sheets may be attached if more space is needed. Fold the form so the BLM address is showing and tape or staple the edges together to mail it. No postage is required.

1. Did we adequately address your comments/concerns from earlier in the RMP process in our range of alternatives? If not, what did we miss?
