Title: Grazing Allotments Nevada (polygon)

Geospatial\_Data\_Presentation\_Form: vector digital data

Series\_Information:

Publication\_Information:

Publication\_Place: Reno, Nevada

Publisher: USDOJ - BLM

Online\_Linkage:

Description:

Abstract: This data is designed to display the Grazing Allotment boundaries within the State of Nevada. The grazing allotments are Federal lands upon which private individuals graze livestock. It is a polygon dataset in which each polygon is assigned a unique allotment number.

Purpose: This data represents the grazing allotment boundaries within the state of Nevada and is intended to be used as a supplemental layer for management purposes.

Supplemental\_Information: The original data is a digitized polygon layer of the grazing allotment boundaries at scales varying from 1:1000000 to 1:24000. The data is periodically updated as new digitized data is created in the Nevada BLM Field Offices.

Data\_Quality\_Information:

Attribute\_Accuracy:

Attribute\_Accuracy\_Report: The data for this layer is checked for accuracy by BLM Nevada staff. The data is updated as new data becomes available. Last updated 03/2005.

Lineage:

Process\_Step:

Process\_Description: Data was originally digitized in MOSS, and was converted to the ARC format in April 1994. The coverage is updated as new digitized data becomes available. The updated data is digitized from a stable base material, and new data scales are 1:100000 and 1:24000.
