

## Decision to Lease

Three parcels totaling approximately 4,579.91 acres of public lands generally available for geothermal leasing under Bureau of Land Management (BLM) land use plans were considered for the geothermal lease sale scheduled to be held on November 17, 2009. On October 2, 2009, approximately 3,779.91 acres on 3 parcels were proposed to be offered at the subject lease sale.

My decision is to offer approximately 3,779.91 acres on 3 parcels of BLM-administered lands with appropriate conditions and stipulations at the November 17, 2009 geothermal lease sale.

The lands to be offered are identified by serial and parcel number on the Final November 2009 Geothermal Lease Sale List, which identifies the specific conditions, terms, stipulations and notices applicable to each parcel.

All of the parcels have been reviewed to determine if existing planning and NEPA documents adequately address the issues and environmental consequences of leasing at this time. My decision to offer parcels in the Cedar City Field Office is based on the findings and recommendations made in the Cedar City Field Office Determination of NEPA Adequacy (DNAs), as modified by recommendations made by the Utah State Office Energy Support Team.
