

Mustang Roundup

Below is a chart showing the number of wild horses and burros found in some of the western states as of 2003. (As you can imagine, it's not always easy to count wild horses and burros, so these are estimates.) But the names of the states are scrambled. Can you help? First, unscramble the state names and then put them in the proper blanks on the accompanying map. Then, color the states according to the map key.

States (scrambled) with the number of wild horses and burros in that state.

devana — 17,930	athu — 2,621	drolocao — 620
myongiw — 5,364	naaroozi — 2,613	antoman — 170
raicnilofa — 4,218	hodia — 697	ewn oxecim — 68
gonero — 2,885		

Color Key	< 1,000 — yellow
	between 1,000 and 4,999 — blue
	between 5,000 and 10,000 — green
	> 10,000 — red

—Did You Know...?—

... that wild ponies can also be found on the East Coast of the United States? They live on islands off the coast of Maryland, Virginia, and North Carolina. To find out more about the ponies and to learn the names of the islands, check out the following National Park Service websites:
