

Brian Amme, Project Manager  
BLM  
Reno Nevada 89520-0006

Sir,

1

I am writing as a forest land owner to register my opposition to the proposal to triple the use of herbicides on BLM managed land in the Western United States as reported in the Register Guard of January 16, 2006. My experience is, herbicides are a short term fix for a monetary gain that results in long term damage to all living things.

Thank You
