Mr. Brian Amme  
PEIS Program Manager  
Nevada State Office  
PO Box 12000  
Reno, Nevada 80520-0006

1/15/06

Dear Mr. Amme,

1 I write to ask the BLM to reject the expansion of use of herbicides on BLM land to fight invasives. I urge you to look at the cause of the spread of invasives, excessive roadbuilding and logging.

2 (a) Invasive species cannot be eliminated without eliminating the causes of weed invasion.

3 (b) Herbicides are not only poisonous and expensive, but they fail because they are "treating" symptoms, not the causes, of weed invasion and undesirable vegetation.

4 (c) The BLM should analyze the Restore Native Ecosystems Alternative in the DEIS/PER, a citizens' alternative submitted to the BLM that addresses both the causes and the effects of weed invasion and undesirable vegetation on public lands ([www.blm.gov/nhp/spotlight/vegEIS/vol2/PEIS\\_Appendix\\_G\\_RNEA\\_Alternative.pdf](http://www.blm.gov/nhp/spotlight/vegEIS/vol2/PEIS_Appendix_G_RNEA_Alternative.pdf)).

Sincerely,

Dean Stevens
