Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 28, 2010.

Populations do not reflect any changes after February 28, 2010. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency is not deducted from the HA acreage.

Most population estimates are direct counts and are not adjusted for animals not observed.

HA acreage totals are calculated based on designations made in the early 1970's.
