

Supplementary Information on the Affected Environment in the General Analysis Areas for the Wright Area Coal Lease Applications Environmental Impact Statement

*West Loadout Facilities
Black Thunder Mine, Wyoming*

*Elk on Reclaimed Rangeland
Jacobs Ranch Mine, Wyoming*

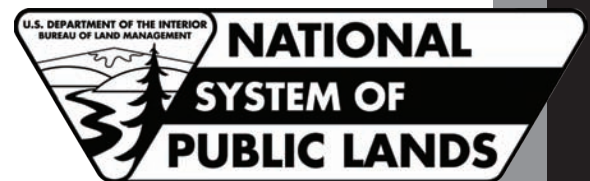

*Elk on Reclaimed Rangeland
Black Thunder Mine, Wyoming*

*Loadout Facilities in Porcupine Creek Valley
North Antelope Rochelle Mine, Wyoming*

June 2009

The BLM manages more land – 258 million acres – than any other Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western States, including Alaska. The Bureau, with a budget of about \$1 billion, also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's multiple-use mission is to sustain the health and productivity of the public lands for the use and enjoyment of present and future generations. The Bureau accomplishes this by managing such activities as outdoor recreation, livestock grazing, mineral development, and energy production, and by conserving natural, historical, cultural, and other resources on public lands.

**SUPPLEMENTARY INFORMATION ON THE AFFECTED ENVIRONMENT
IN THE GENERAL ANALYSIS AREAS FOR THE
WRIGHT AREA COAL LEASE APPLICATIONS EIS**

Prepared by

**WWC Engineering
Sheridan, Wyoming**

Under the Direction of

**U.S. Department of the Interior
Bureau of Land Management
High Plains District Office
Casper, Wyoming**
