

APPENDIX D**DEFINED NON-SITES AND PROPERTY TYPES
REQUIRING NO FORMAL DOCUMENTATION**

BLM cultural resource specialists must review and approve any deviation from this list. In most cases, formal documentation of the property types listed below is not required. **Existence of these defined non-sites and property types within the survey area, and justification for their exclusion, must be discussed in the project report.** If any of these property types exhibit significant architectural or engineering features, or are associated with a National Register-eligible site or district, they should be recorded on a Wyoming Cultural Properties Form. Professional judgment and common sense should be applied. In general, Smithsonian numbers will not be assigned to the following property types:

1. Utility lines (i.e., power lines, towers, telephone lines, fiber optic cable, etc.)
2. Pipelines (i.e., water, gas, etc. This does not include early wooden pipelines)
3. Stock dams, troughs, spring boxes, and associated windmills that post date 1930
4. Elevation, bench, and section markers
5. Car banks (i.e., the use of abandoned cars, farm machinery, appliances, etc. to stabilize riverbanks, stream banks, or drainages)
6. Rip-rap (i.e., the use of cobbles, rock, or wood to stabilize riverbanks, stream banks, or drainages)
7. Isolated abandoned motorized vehicles, appliances, and all mobile homes
8. Fences and enclosures (i.e., barbed wire, chain link, buck-and-pole, or other types of pasture fence.) This does not include corrals, roundup or load-out facilities
9. Unnamed two-track roads (i.e., ranch roads, seismic roads, etc.). This will require standard historic research to determine if the roads are named. Named roads need to be formally recorded; generally, unnamed roads do not need to be recorded. Discuss in the report the historic research conducted (i.e. GLO check, county records, historic maps, etc.)
10. Recent trash (i.e., highway trash, etc.)
11. Producing oil/gas wells and dry hole markers

12. Agricultural irrigation ditches that are ephemeral in nature or may have changed location over time
13. Bear baiting sites
14. Trash dumps or historic artifact scatters older than 50 years for which historic significance cannot be demonstrated and/or the trash dumps do not provide any significant information (e.g. truck clean-out sites, strips and disks, etc.). This applies regardless of the number of associated artifacts
15. Samples of defined lithic landscapes. Approval from the cultural resource specialists from affected the field office must be obtained for the cultural resource permittee to apply this exclusion
16. Short-term camps associated with stockgrazing and recreation that provide no significant information
17. Temporary sawmill sites, slash piles, and isolated woodpiles
18. Prospect pits associated with mineral exploration or mining with no associated features, cribbing, and/or less than 50 associated historic artifacts
19. Engineered roads built as part of the State Highway System (generally after 1928, the year the privately administered Lincoln Highway Association was dissolved) do not require any documentation beyond what is on file at the Wyoming Department of Transportation. Roads built during the Great Depression (e.g. CCC, WPA – generally these are not on the State Highway System) require documentation and evaluation.
