

**CONTENTS**

**Executive Summary**

**Acronyms and Abbreviations**

**1.0 INTRODUCTION .....1-1**

    1.1 Objectives ..... 1-2

    1.2 Key Issues ..... 1-2

    1.3 Agency Outreach, Coordination, and Review ..... 1-10

**2.0 TECHNICAL APPROACH .....2-1**

    2.1 Overview of Assessment Approach.....2-1

    2.2 Air Quality Modeling Protocol.....2-1

    2.3 Model Input Data .....2-6

        2.3.1 Emissions Inventory Data Overview .....2-6

        2.3.2 Construction-related Emissions .....2-6

        2.3.3 Operational Emissions.....2-7

        2.3.4 Meteorological Data.....2-7

        2.3.5 Ambient Air Quality and AQRV Data .....2-8

        2.3.6 Chemical Species .....2-12

        2.3.7 Visibility .....2-13

        2.3.8 Lake Chemistry.....2-13

    2.4 Air Quality Modeling and Post-processing.....2-13

**3.0 DESCRIPTION OF CURRENT CONDITIONS.....3-1**

    3.1 Air Quality Standards.....3-1

    3.2 Meteorological Conditions .....3-1

    3.3 Air Quality Conditions .....3-3

    3.4 Visibility .....3-6

**4.0 MODELED BASE YEAR IMPACTS .....4-1**

    4.1 Emission Inventories .....4-1

    4.2 Receptors.....4-1

## Contents

---

4.3	Summary of Impacts.....	4-3
4.4	Impacts on Ambient Air Quality.....	4-3
4.5	Impacts on Visibility .....	4-4
4.6	Impacts on Acid Deposition.....	4-14
4.6.1	Acid Deposition.....	4-14
4.6.2	Impact on Sensitive Lake Acid Neutralizing Capacity.....	4-15
4.7	Analysis of Hazardous Air Pollutants.....	4-15
<b>5.0</b>	<b>REVIEW OF PREVIOUS STUDIES.....</b>	<b>5-1</b>
<b>6.0</b>	<b>REFERENCES.....</b>	<b>6-1</b>

**LIST OF TABLES**

1-1 Ambient Monitoring Sites and Data Summary.....1-6

1-2 IMPROVE Monitoring Sites within the Modeling Domain.....1-9

2-1 CALMET User-defined Fields not Specified in IWAQM Appendix A .....2-11

2-2 Air Pollutant Background Concentration .....2-11

2-3 IMPROVE Protocol Aerosol Monitoring Sites to be Used in Determining Background  
Monthly Average Particulate Matter Speciation Profiles .....2-12

2-4 Estimated Natural Background Visibility Reference Levels .....2-14

3-1 Applicable Ambient Air Quality Standards .....3-1

4-1 Summary of Modeled Air Quality Impacts.....4-3

4-2 Modeled Concentrations of NO<sub>2</sub>, PM<sub>10</sub>, and SO<sub>2</sub> .....4-5

4-3 Modeled Impacts on Visibility at Indicated Receptors .....4-12

4-4 Modeled Deposition for Nitrogen and Sulfur .....4-17

4-5 Impacts on ANC of Sensitive Lakes.....4-19

4-6 Evaluation of Acute Concentrations of HAPs .....4-20

4-7 Evaluation of Annual Concentrations of HAPs .....4-21

**LIST OF FIGURES**

**1-1** Study Area.....1-3  
**2-1** Modeling Domain, Project Areas, Population Centers, and Sensitive Areas .....2-2  
**2-2** Receptor Locations for Sensitive Areas .....2-5  
**2-3** Weather Stations with Surface Data Considered in CALMET Modeling for PRB Air  
Quality Impact Assessment .....2-9  
**2-4** Weather Stations with Precipitation Data Used in CALMET Modeling .....2-10  
**3-1** Annual Wind Roses at 10-meter Level at Selected Cities in 1996.....3-2  
**3-2** Topography of the Modeling Domain, Population Centers, and Sensitive Receptors .....3-4  
**3-3** Mean Annual NO<sub>2</sub> Concentration in the Wyoming PRB.....3-5  
**3-4** PM<sub>10</sub> 24-hour Concentrations for Select Black Thunder and North Rochelle Sites .....3-8  
**3-5** PM<sub>10</sub> 24-hour Concentrations at Select Black Thunder and Antelope Sites .....3-9  
**3-6** PM<sub>10</sub> Annual Concentrations at Select North Rochelle Sites .....3-10  
**3-7** 3-hour SO<sub>2</sub> Concentrations.....3-11  
**3-8** Deciview Trend Analysis of Percentile Distribution for Bridger WA .....3-12  
**3-9** Deciview Trend Analysis of Percentile Distribution for Badlands National Park .....3-13  
**4-1** Near-field and Far-field Receptor Locations Used in CALPUFF Modeling .....4-2
