
Wyoming BLM Fire/Fuels/Aviation Management Core Values* and Guiding Principles

- Firefighter and public safety is our #1 priority... With a focus on high reliability organization principles and characteristics
- In an era of declining budgets, maximize career and seasonal on-the-ground employees... With a workforce that reflects the diversity of the public we serve
- Integrating Fire/Fuels/Aviation with Resource Management to achieve desired objectives and conditions... With expenditures commensurate to values at risk

*In their book, *Built to Last - Successful Habits of Visionary Companies*, authors James Collins and Jerry Porras define the purpose of core values as follows: “Core values are the organization’s essential and enduring tenets, not to be compromised for financial or short-term expediency.” Core values, whether for an individual or an organization, exist to guide the decisions we make, priorities we have, and directions we take.
