Comment:

This "plan" is nothing more than a giveaway of public lands ... more welfare for big corporations. It is as shameless as your recent modification of grazing rules that ignored your own agency science and provided more welfare to public-land ranchers at the expense of the public. Your agency is another example of a regulatory agency climbing into bed with those it is supposed to regulate. And, that is an element of fascism ... and look up the definition of the word if you don't like it being applied to you -- preferably from a dictionary no later than 60's era, before the definition became watered down to accommodate the growing fascism in this country. DO NOT "DISPOSE OF" OUR PUBLIC LANDS. THEY ARE ABOUT ALL WE THE PEOPLE HAVE LEFT.
