BIM Casper Field Office

9-28

We would like to comment on the proposal to a of public Lands in Platte, Converse, Natrona and Counties. We understand to develop energy th Corporations must have access to lands where ene is. This access must be done in such a way a not harm the environment. We suggest a more study of this proposal before any action is take. Public lands should not be taken over by priva owners, thereby denying access to the public. Acc the past, to these Lands, has been available of us. Our grandchildren should enjoy the same opportunities we have had in the past and not a xpense of developing minerals and energy.

We ask you to give ACEC protection to Cedar North Platte River, Southern Big Horns, Red Wall, Mud Mountain and the Black tailed Prairie Dog Comp.

The South Fork of The Powder River should also be considered for Wilderness designation. Oil ad b should not be allowed on important wildlife habitat sensitive environmental areas
